### Rare View Of Orchards of Salem

(Continued from page one)

air stratum in its easterly drift was  
bearing a delicious array of blended  
blossoms that caused pilot and pas-  
sengers to "sit up and take notice."  
North of the Cherry city, few bloom  
areas were visible, although further  
down the valley could be glimpsed  
the white and green borderings of  
the Keizer and Mission Bottom dis-  
tricts. Eastward, one viewed more  
hop fields and open cultivated stretch-  
es, interspersed with scattered patches  
of white, against which a faintly  
etched background. Despite the  
unobscured view through the valley,  
Mount Hood was only dimly visible  
because of a shroud of purplish mist.

**Orchards Dominate View**  
Southeast, south and southwest of  
Oregon's capital, the fairy garlanded  
orchards of the Morningside, Liberty  
and Rosedale additions attracted the  
eye. The glistening crescent of the  
Willamette formed the western border  
of this flowery pattern, through  
which well outlined highways  
streamed.

As the hydroplane swerved to the  
west one was attracted by the fur-  
flung orchards belt on the eastern  
slope of the Polk county hills.

Blossom land, in truth! east, west,  
north and south of Salem, these fruit-  
ful sections combine to uphold the  
standard of prosperity for the many  
projects and industries dependent  
upon these prolific orchards.

**Flowers Fall On City**  
Completing the tour of field and  
orchard, Captain Lees, who had care-  
fully timed this feature of the flight,  
circled back over the capital buildings  
flying from this point across the busi-  
ness district. On this circuit the  
signal was given and just as the clock  
in the courthouse, chimed the  
hour of noon, Mr. Fullerton released  
the cornucopia of blossoms, which as  
they descended formed a brightly  
tinted streamer as they scattered  
down to fall into the hands of chil-  
dren who vied with each other in  
securing a floral souvenir of Salem's  
first Blossom Day.

After twelve minutes of flight, the  
"Sea-Gull's" motor ceased its ma-  
chine-gun-like explosions and the  
machine volplaned gently to the river  
at a point near Minto's Island. The  
most exciting feature of the trip is  
the landing, and as the flying boat  
nears the water's surface, the occu-  
pants are made to realize the fact  
that they have been speeding through  
the air at not less than 90 miles per  
hour. As Captain Lees makes the  
deft landing there is general regret  
that this mode of travel is not more  
common, so that it could be more  
frequently enjoyed by all of us.

**Phone Company  
Given Rate Equal  
To Competing Line**  
An increase in rates of the Union  
County Telephone company to a point  
comparable with the lowest rates  
charged by the Home Telephone com-  
pany operating in the same territory,  
is granted in an order issued by the  
public service commission and effective  
May 1st.

The new order affects all patrons of  
the La Grande, Cove, Union, Elgin and  
Summerville-Imbler exchanges of the  
Union Telephone company. The order  
also abolishes free interexchange of  
service between the various exchanges  
of the company, which practice is  
characterized as "unjust, unreasonable

**Returned  
To Prison Here**  
The man who walked away from  
the regular sanitarium, March  
place he had been trans-  
ferred from the state  
penitentiary to the peni-  
tentiary at El Paso, Tex.,  
was arrested last week,  
bringing a sentence of from  
thirteen months for killing  
Hodell, a Portland hotel  
owner.

**ARMY PLANS BOYS AND GIRLS  
INDUSTRIAL AND AGRICULTURAL SCHOOL**  
The big phases of the work the Salvation Army is doing in  
the city, is the training and care  
of the boys and girls. One of the items of the budget to be raised  
for the school at Yamhill as an industrial and agricultural school  
will be educated and made efficient workers so  
they can go out into the world they will be an asset to society and  
the communities of which they will be members. The  
school will have a walnut grove and other orchards, and, under proper  
supervision, the school will teach the boys, its productivity will go  
into the vocational institution but on the other hand it is intended  
to give the boys a practical education for youngsters who, without it, are on

and unjust discriminatory" and fixed a schedule of tolls.

Since the application for increased rates was filed with the commission the Union county telephone has disposed of its interest in the Union, Cove and La Grande exchanges to the Home Telephone company of La Grande and its Summerville-Imbler and Elgin exchanges to W. P. Ballard and Fred G. Henning. The new rates, however, are applicable to service to be rendered patrons of these exchanges under the new ownership.

### Miscible Oil Spray Advised As Means To Control Thrip

Oregon Agricultural College, Corvallis, April 26.—Pear thrips may be controlled by miscible oil sprays applied when the thrips start emerging from the ground in the spring during the pink blossom period or calyx period, explains A. L. Lovett, professor of entomology at the O. A. C. experiment station.

"The thrip has been doing a small amount of damage during the last two or three years," says Professor Lovett, "which varied in severity from light disorders when a fair per cent of fruit showed a heavy drop to more serious disorders when winter buds on the trees failed to put out at all."

"The adult thrips are a twentieth of an inch long and dark in color. They run with a gliding motion and may be seen in considerable numbers crowded down in the unfolded flower and leaf buds."

"They pass the winter under seven to nine inches of soil and on emerging in the spring swarm up the trees and attack the developing portions."

"They begin depositing their eggs in the leaf and fruit stems about the time the petals begin to fall. The larvae hatch in from four to five days and soon attack internally the under side of leaves, calyx of the blossoms

and the developing fruits. They reach full size in about 16 days.

"The larvae drop to the soil in June and remain as larvae until early fall, when they transform into the pupae stage. They complete transformation to adults late in September."

### Public Service Board Sets Time For Nine Hearings

The controversy between the Southern Pacific company and the Standard Box & Lumber company, involving the payment of demurrage charges will be aired before the public service commission at a hearing in Salem Thursday afternoon. Other hearings before the commission are scheduled as follows:

Salem, April 29.—Application of the Standard Oil company for permission to construct a spur track across the Turner road near Salem.

Archie, Polk county, May 5.—Application of Sunfire Telephone company for permission to discontinue service.

Independence, May 5.—Application of Independence Telephone company for increase in rates.

Dallas, May 5.—Application of Dallas Telephone company for increase in rates.

St. Helens, May 7.—Application of St. Helens Lumber company for permission to discontinue heating service.

St. Helens, May 7.—Demolition of Standard Oil company for permission to construct a spur crossing.

Gearhart, May 8.—Application of city of Gearhart for permission to construct underground crossing.

### EDUCATOR PASSES

Chicago, April 26.—Dr. William Cleaver Wilkinson, 87, professor of poetry and criticism at the University of Chicago, died yesterday as the result of injuries sustained two weeks ago in a fall.

### Attorney General Defines Meaning of Term "May"

"May" as primarily and ordinarily used in a statute is permissive and not imperative, according to an opinion prepared by Attorney General Brown for the information of the state irrigation securities commission. The opinion was prepared in connection with the application of the Kinman Colony drainage district in Malheur county for state guarantee of interest payments on a \$50,000 bond issue.

Some question was raised by members of the commission as to the legality of the issue which did not conform to the provisions of the state law which declares that "said bonds may be issued so as to mature serially in annual amounts so as to be approximately equal principal and interest." This provision is entirely discretionary on the part of the directors of the drainage district, according to the attorney general who holds that failure to issue the bonds in conformity therewith in no wise impairs the legality of the issue.

### Freshman Wins Essay Contest

Verne Bain, freshman, won the first prize in the Willamette university essay contest, receiving the five dollar prize offered by Attorney E. M. Doney. Miss Bertha Leitner won the second prize of \$2.50, given by Judge Doney. The subject on which the essays were written was "Willamette as a preparation for life." The other contestants were Paul Wapato, Leslie Bailey and Jacob Nickel. In presenting the prizes to the winners, President Doney took occasion to praise the efforts of the manager Fred McGraw, who conducted the contest.

and who has placed forensics on a strong basis in the university for the first time in several years. Besides the usual debates and oratorical contests, he has introduced interclass oratory, interclass debate, inter-society oratory and debate, women's debates, the essay contest and a written oration contest which is still to be conducted.

### Scientists Discuss Size Of Universe

Washington, April 25.—Scientists representing colleges and universities in every section of the country attended the opening here today of the annual meeting of the National Academy of Science. Tonight two California astronomers will discuss the size of the universe. Dr. Harlow Shapley of the Mount Wilson observatory believes the size of the universe is many times greater than held in the older theories. Dr. Heber D. Curtis of the Lick Observatory will defend the older view, that the dimensions suggested by Neuhumb is correct.

Final decision is expected soon in the Klamath county court house suit. Although the county has two new court houses the old one is still being used.

### NEBRASKA HAS SNOW

Lincoln, Neb., April 26.—A light snowstorm prevailed in eastern Nebraska today. The storm is moving toward the northeast, the weather bureau reported.

### Smoke Too Much? Let Nicotol Help You Quit

Do you smoke too much? Thousands of men do and know it. They want to smoke less or quit altogether but will not punish themselves to endure the craving that follows leaving off. Such men need Nicotol which kills the craving and makes cutting down the use of tobacco or quitting altogether easy and pleasant. Nicotol cures the craving for tobacco, tones up the nerves and keeps you feeling fine and fit. Go to any drugstore for a package of Nicotol tablets sold under a steel band guarantee of satisfaction or money refunded.

Note—Ask your druggist what others say about the wonderful power of Nicotol to break the tobacco habit. He knows and he can be trusted to tell you the full truth. D. J. Fry.

### OUR BREAD MAN

Is one of the most skillful in the land. What he doesn't know about bread making isn't worth knowing. Just to prove to yourself how foolish it is to swallow over a hot oven, try a loaf of our BAKE-RITE bread. Our electric ovens bake just right. Once tried it is always a favorite.

# REDUCED PRICES ON MAZOLA

in pints, quarts, full gallons, half gallons.  
Now Selling at all grocers

Now is the time to buy. Buy in Quantities

Once You Try Mazola You Will Never Go  
Back to Lard or Butter for Cooking—  
or Olive Oil for Dressings

OF interest to every wide-awake housewife are  
these important facts about the general use,  
the quality and the unusual economy of Mazola.

## Deep Frying

No fat excels Mazola for deep frying. It is far better and a great deal more economical than lard or compounds. Mazola is 100% pure vegetable fat. It contains no moisture. Butter and Lard contain moisture. The same lot of Mazola can be used over and over again—even after frying fish and onions. Merely straining makes it perfectly fresh for use as a shortening. It carries no odors or flavors from the foods cooked in it and does not smoke up your kitchen.

## Shortening

The purity and richness of Mazola best demonstrates itself in the fact that 1/4 to 1/3 less Mazola is required than that of butter or lard. This means that your cakes and pie crust will not only be light, rich and easily digested but will cost you less to prepare. Being an oil, the tiresome "creaming-in process" is eliminated. Mazola is always ready for instant use.

## Salad Dressings

Thousands of Italians, who certainly know olive oil, use Mazola. Not only because it costs about half that of the best olive oil, but because of its richness, quality and purity. For French Dressing, Mazola blends readily—and mayonnaise made with Mazola will keep for weeks without separating.

CORN PRODUCTS REFINING COMPANY, 17 Battery Place, New York  
Selling Representative  
JOHNSON LIEBER CO.  
Portland, Ore.

### Important to Housewives

One of the most severe comparative tests ever used on a cooking fat gives unqualified FIRST HONORS to Mazola.

Understand the remarkable economy and high quality of Mazola by these figures.

#### FRENCH FRIED POTATOES

2 lbs. of Mazola	fried	26 lbs. Potatoes
2 lbs. of Lard	"	8 " "
2 lbs. of Compound	"	11 1/2 " "

Note: Mazola goes over three times as far as lard; is twice as economical as compound.

#### FISH

2 lbs. of Mazola	fried	25 lbs. Fish
2 lbs. of Lard	"	15 " "
2 lbs. of Compound	"	20 " "

Note: Compare the figures yourself. Even with frying fish Mazola does not smoke up your kitchen.

#### DOUGHNUTS

2 lbs. of Mazola	fried	216 Doughnuts
2 lbs. of Lard	"	144 " "
2 lbs. of Compound	"	168 " "

Note: All doughnuts were the same size. Mazola - made doughnuts are more easily digested.

P. S. Reasons for these remarkable figures are explained in column to the left. Read it.
