Profits Helped Build Our Business

Do you think it's right to save money?

Swift & Company's business has been built up partly by selling capital stock for cash and partly by thrifty saving, putting some of our earnings each year back into the business to increase facilities for production.

That is what most all of us seek to do—save part of our earnings for future usefulness.

It is the way American industries have been built up. It means the least drain on the financial resources of the country.

For the past twenty-four years Swift & Company has made an average profit from all sources of 11.3 per cent on investment (capital and surplus), and 2.3 cents on each dollar of sales—a fraction of a cent per pound. Out of this we have paid dividends and saved something to help us keep pace with a growing country.

"REBECCA OF SUNNYBROOK FARM"

Nearly everybody knows the Quality of good Fresh

Holsum Bread

But there are some who do not and it is hard to tell them. Every good strong word we know has been used and misused on ordinary bread, and there seems to be nothing left to describe extraordinary quality

If any housewife wants to know how hard it is to describe

HOLSUM

Let her use it on the table, then try to find words to describe the quality.

Only the BREAD itself can tell the story Clearly
