Logging Camps At Mehama To Close For Time

Mehama, Or., June 15.—Operations in the Silverton Lumber company logging camps near here will be suspended the latter part of this week until some time next month. Some of the men went out of camp yesterday. In the meantime Thomas Day, the foreman, will keep a small crew of men at work finishing the cook shanty. Mr. Day hopes to be ready for operation July 6th, and instructed the men who went out yesterday, to be ready for work at that time if they are called. On account of the car shortage the mill at Silverton is not running, and unless there is relief in this respect it may be that the mill and camps will be idle through most of July.

William McLaughlin and wife left for Portland yesterday. Mr. McLaughlin has been here for some time, having had the contract for constructing the trestle work for the Silverton Lumber company.

The superintendent of the bridge construction work arrived here Saturday and has opened an office in the I. O. O. F. building, which will be his headquarters for several months pending the completion of the new steel bridge across the Santiam river. Work of building the bridge piers has already commenced, but the work has been retarded on account of rain and resultant high water in the river.

The Lyons schools will close next Friday with the usual closing day exercises. Some of the pupils of Mehama have been attending school here since the Mehama schools closed several weeks ago. This was made necessary in some cases in order to complete the eighth grade course.

When the bridge construction work reaches a point where traffic over the old bridge must cease, it will be difficult to find a crossing place. The banks are very high at this point and the problem seems to be worrying the stage men and people who have to travel over the road between here and Lyons.

Mr. Saucier will remain in Salem until after the funeral.

Mr. Nelson has the frame up for his store building and the work will be rushed as rapidly as possible. He expects to be ready for business by the first of July.

Mrs. Warren Richardson and children arrived here from Stayton a few days ago. Mr. Richardson has been employed here for some time.

In the Gates valley a few miles east of here is developing a young Hood River. Fruits of several varieties are being planted and the country is rapidly growing. It is said that the soil and climate are adapted to the production of fruits and growers are very much interested over the future prospects.

There's no more pain after a few drops of "Gels-It" lands upon corn or callus and instantly dries.

In a day or two you lift the old misery maker right off without even feeling it. That's the last of Mr. Corn and the last of your misery. Millions who have lost their corns the "Gels-It" way say it is the only common sense way to get rid of the pests.

"Gels-It" the never failing, guaranteed money back corn remover costs but a trifle at any drug store.

Silverton Men Purchase Pure Blood Jerseys

Silverton, Or., June 15.—Arthur Leebart and M. E. DeGure, datymen of Silverton, attended the auction sale of H. W. Hand of Orlando, California, Friday, at the fair grounds, and Saturday afternoon each returned with three head of fancy Jerseys purchased. It is said, at fancy prices. Silverton took nearly half of the herd which consisted of twenty head of Jersey calves and heifers. The investment aggregated, it is said, nearly \$3000.

Steelhammer. C. G. Pitney, who has been employed in the Silverton Lumber company camps for several months, near Mehama, arrived in the city last evening and will remain until after the Fourth. E. D. Finis For Town Of Gooch Seen In Mill Closing

Mill City, Or., June 15.—Moving day, definite and permanent, is said to be rapidly approaching the little lumbering town of Gooch three miles west of this city on the Lin county side of the Santiam. The mill, which has been constantly operated at that place for several years, has been shut down and the camps have suspended operations.

The planer is finishing a small pile of lumber and when this is done, according to a statement of W. J. Bertrum, manager of the enterprise, the machinery will be moved to some other location. Just where that will be is not known. Negotiations are now pending, said Mr. Bertrum, and within 30 days we will know just what disposition will be made of the mill. There are two or three prospects in view, he said, but I am not prepared to say at this time which one will be accepted. It is certain, however, that the mill will be moved. Mr. Bertrum has been in charge of the property for the past two and one-half years, and the business has been conducted with a great degree of success. Between fifty and sixty men have been given employment in the mill and camps. The removal of the mill is made necessary by reason of the fact that the timber has been cut off and manufactured into lumber.

Gooch has one store at the present time and in this is the postoffice maintained for the accommodation of the mill people. The store is operated by C. E. Phillips, who is also postmaster. Mr. Phillips said the store would go out when the mill goes, and the post-office will likely be discontinued. He has made no arrangements or plans about moving, and will not until the mill company takes some definite action. But it seems certain that the little town, which sprung up a number of years ago when the lumbering enterprise was established, will be extinct within a few months.

\$200,000 UNSOLD PORTION PREFERRED Paper Mill Stock

We offer the unsold portion of the \$600,000 issue cumulative 8 per cent Preferred Stock of the Oregon Pulp & Paper Company, Salem, Oregon.

This mill is one of the most modern paper mills in the country, is equipped with high grade sulphite specialties, such as glassine and greaseproof papers at present not manufactured on the Pacific Coast as well as wrapping, tissue and waxing papers. The mill buildings are about completed, the machinery being erected, and the plant will be in operation very shortly.

This preferred stock is cumulative from July 1, 1920, pays 8 per cent per annum, dividends payable monthly; none of the stock of this company either preferred or common has been sold for less than par, \$100 per share.

The ownership of the \$600,000 common stock rests largely with F. W. Leadbetter, the president, also president of the California-Oregon Paper Mills with mill in Los Angeles, and for 25 years a large stockholder and director of the Camas, now the Crown-Willamette Paper company. And the C. K. Spaulding Logging company, which owns a saw mill adjoining the paper mill at Salem, and furnishes the new mill with sawdust for fuel and the necessary wood for the 50 tons of sulphite daily made in the sulphite mill. Mr. C. K. Spaulding, the president of the logging company, being vice-president of the paper mill, and the fact that Mr. Spaulding and Mr. Leadbetter each own one-half of the Spaulding Logging company, which in turn owns nearly one billion feet of timber with its own logging roads, assures the new paper mill of its raw materials without the great expenditure for timber usually necessary to supply a great paper mill enterprise.

These two interests combined with the heavy holdings of the local Salem stockholders, and Mr. E. R. Collins and the Ladd estate of Portland, comprise the ownership of these mills and makes of this plant a distinctive Oregon corporation, designed, owned and operated by Oregonians.
