## Eye Talks

—Are you a bookkeeper, stenographer, draftsman, benchworker?  
 —Is your occupation one that requires you to use your eyes continuously for close work?  
 —Such occupations put maximum task upon the eyes. Men and women who earn their living in these ways should give exceptional attention to the care of their eyes.  
 —Particular pains should be taken to make certain that the light falls upon the work from the right direction and that it is neither too strong nor too dim.  
 —Then the eyes themselves should be watched carefully for symptoms of strain—smarting, blurring, pain in or about the eyes, headaches, nervousness, undue fatigue.  
 —If you have the slightest suspicion that your eyes are being strained, do not wait until serious trouble develops, but have us make a determinative examination at once.

**G. O. P. Invades Georgia.**  
 Atlanta, Ga., Nov. 4.—Tennessee and Louisiana were not the only states in the "solid south" in which the republicans made unexpected gains. Latest reports from Florida show that Senator Harding carried a number of towns, including St. Petersburg, Orlando and Daytona. The returns from the voting districts are coming in very slowly and republican leaders predict they will show further gains.  
 For the first time in history several towns and country precincts in the sixth Mississippi district gave republican majorities. Some counties in Alabama heretofore strongly democratic also returned republican majorities.  
 In two congressional districts in the south, the Seventh Alabama and tenth North Carolina, the republican candidates for congress have made charges of fraud and threaten to contest the election of the democratic representatives.  
 A politician doesn't feel that he has made an earnest campaign unless he has managed to insult every friendly nation on the globe.

## VALUE RECEIVED AND THE PRICE OF A CAR

When you buy an automobile, the car itself represents only the physical expression of the profit and service you expect to receive from an automobile. The real value of the car lies in its ability to perform as you expect it to.  
 There is no price on this. You get it or you do not get it when you buy your car—it depends entirely on who sells you the car.  
 Without dealer responsibility for car performance, no car is a bargain, even if you get it for a dollar. With a good dealer obligated to make the car give satisfaction, any car is worth the price, whatever that may be.  
 The manufacturer puts quality into the car. The dealer puts actual running ability.  
 Cars bought here are always what their owners expect of them.
