American railways had placed orders with twenty-three leading car-building companies for only 24,714 freight cars when the year opened, according to information obtained by the department from various sources. On August 1 the number ordered and undelivered amounted to 50,275. Those built and those on order August 1 totaled 71,275. According to the Railway Age, if all on order were built by the end of the year the number would fall short of 100,000, the average number of new cars

needed annually to replace old ones. The year, therefore, is expected to show a new low record in car production. The smallest number of freight cars ever built in a year was 58,226 in 1915. In 1919 the number was 67,083.

New passenger cars on order and built up to August 1 totaled 860. If all these are completed this year the number will be the smallest recorded except in 1919, when 306 were built.

Stops Medicine--- Health Recovered by Internal Baths

Mr. A. Czarniecki, 657 Montgomery St., San Francisco, Cal., writes Tyrrell's Hygienic Institute of New York as follows:

"I must admit that the use of the 'J. B. L. Cascade' has cured chronic constipation from which I suffered. Since May 12, 1913, I have never even tasted any kind of patent medicine or purgative. My health is excellent in every respect."

Over half a million bright, keen, intelligent Americans have found that internal bathing is more essential to their health than external baths.

Have found that used occasionally at night they feel like different people the next morning. No more of that bilious, tired, nervous feeling, but having by nature's own cleanser—antiseptic warm water—removed all the poisonous waste from the lower intestine, they awake thoroughly refreshed by normal sleep, with all their functions acting properly, clear headed, happy and confident, eager and capable for the duties of the day.

Why not learn more about this rapidly growing and natural practice. The "J. B. L. Cascade" is the invention of Chas. A. Tyrrell, M. D., of New York, a specialist on internal baths for 25 years, and is now being shown and explained by Daniel J. Fry who will give you—free on request—an interesting booklet on the subject called "Why Man of Today is Only 50 percent Efficient." (adv)

Ruth Roland, that beautiful actress, is famous for her wonderful complexion. When her friends inquired about it, she said "It's all due to a simple toilet preparation called derwillo, which I use twice daily. Any girl or woman can beautify their complexion if they follow my advice. Here it is: Just go to any up to date toilet counter and get a bottle of derwillo, use it as directed, and the first application will astonish you. It immediately gives the skin a youthful, rosy white appearance and clear baby softness so much desired by everyone." The easy way to beauty in a simple cake of soap

HOW do you keep your face clean? Do you give it a hasty daily washing with any old soap? Or do you perhaps depend on cold cream to remove dirt and dust? Either method is dangerous and invites bad results. Careless washing makes the skin rough and coarse. Yet complexions get soft and flabby without the tonic of water. The secret is—make washing your face a real beauty treatment. How—by using Palmolive Soap, the beautifying cleanser. The Palmolive lather is so mild that it

cleanses without irritation, no matter how sensitive is your skin. Profuse and creamy, it penetrates every tiny pore, removing the dirt, dust and oil secretions, which, when neglected, clog and irritate. Apply Palmolive Cold Cream and apply it liberally. If your skin is dry, use it both before and after washing. Palmolive is the scientific modern combination of the Palm and Olive oils Cleopatra used. It is the favorite facial soap of millions who have learned that while you pay more you can't buy better.

THE PALMOLIVE COMPANY, MILWAUKEE, U. S. A.

PALMOLIVE

Why doesn't it cost more?

Because the Palmolive factories work day and night to supply the demand. Because the rare Palmolive ingredients are bought in enormous quantities. Thus the price of Palmolive is kept moderate—no more than for ordinary soap. It can be enjoyed by every woman and procured everywhere.
