Ice Cream Bill Expected to Rile Manufacturers
A bill regulating the manufacture of ice cream, introduced in the house today by Representative H. J. Overturf of Bend is said to be one that will likely bring protest from ice cream manufacturers, as did a previous attempt in 1919, to increase the butterfat content.

The Overturf bill provides that not to exceed one percent by weight of a harmless thickener shall be used; that ice cream must contain not less than twelve percent by weight of milk fat and that the acidity shall not exceed three tenths of one per cent.

Fruit or nut ice cream must contain nine percent of milk fat.
