Young Communists Flocking to America to "Cause Trouble" Is French Claim

Paris, Oct. 21.—French police officials asserted today that more than 100 members of the young communist organization in Europe had slipped through the immigration lines and reached the United States within the last two months for the purpose of "causing trouble" if the two Italians, Sacco and Vanzetti were executed for the murder of which they were convicted in Massachusetts last summer.

Many of these men, the officials said, had been refused passports at the American passport bureau in Paris, but later were able to get to America by other means. The police are working on the theory that some of these communists who failed to get through the lines were responsible for the bomb sent to Ambassador Herrick, which blew up in his home Wednesday. This theory is the result of a threat made by a young communist who said he was an Italian at the American passport office here Monday when the officials told him they could not give him a visa for America unless he conformed with the regulations. The applicant, who gave his age as 23 years, became angry when refused explaining, "somebody will get killed for this." A guard was immediately placed at the entrance to the office. This man, the police think, may be one of the group responsible for the bomb sent to the ambassador and threat made against American officials in France.

Ambassador Herrick, when he returned to his office this morning, found 48 additional letters of protest in connection with the Massachusetts case, two of them containing threats of reprisals against Americans if the executions took place. The guard at the embassy was increased today and every possible precaution has been taken to protect the passport bureau, the reparations commission offices and the American consulate. The communist mass meeting of protest against the conviction of the two Italians, called for tonight in one of the largest halls of Paris, is causing some apprehension and the republican guard has been called out to keep order and prevent demonstrations of any kind in front of the embassy or other American offices.

Lenine Says Capitalism Threatening

Moscow, Oct. 21.—Nikolai Lenine, the Russian soviet premier, in a speech here today on Russia's new economic policy, declared:

"We must face the fact that we are re-establishing capitalism and also the question of whether the peasantry will follow the capitalists or the communists. If the capitalists organize quicker and better they will send us communists to the devil.

"Our problem is to make the future capitalism subject to the state and serve it. "The present return to capitalism is not the reestablishing of private ownership but of personal communistic interests. In order to reorganize our economic life we must interest every specialist; and in this we have failed so far by direct attack. Now we must make a turning movement. If we again fail, every one of us will go to the devil and be hanged and will deserve it.

"I say to you: Go into business. Work with the capitalist by your side, both Russian and foreign, who will get 100 per cent out of you. Let him get rich but learn from him, and only then will the true communistic republic be created. It is hard, difficult, wrenching toil, but all of us must do it, as there is no other way out."
