**25 Miles at 96<sup>98</sup>/<sub>100</sub> Miles Per Hour**

Just one year ago—on May 18th, 1921—the Paige Daytona Model 6-66 astounded all motorists by breaking every world's stock chassis speedway record from five to 100 miles. These are the most highly prized records in the automobile world for they are final and convincing proof, not only of power and speed, but the more heroic qualities, brute strength and endurance. Now—since no one else has challenged—Paige has bettered its own mark. Piloted by Earl Cooper, in a dash against time, the Paige 6-66 Daytona Model covered 25 miles in 15 minutes 27.95 seconds on the Cottati, California Speedway, May 7th—a new world's stock chassis record. The old mark, held by the Paige, was at an average of 92.1 miles an hour. The trial was officially sanctioned by the A. A. A., was timed by its officials and the chassis checked as strictly stock. In view of these official and recorded facts the title, Master of the Highway, honestly won a year ago, remains unshaken.
