

# BULLETS AIMED AT REPUBLIC IS EBERT'S AIM

Berlin, June 28.—(By Associated Press.)—The assassins who killed Dr. Walter Rathenau, Germany's minister, were striking at the republican government of Germany and its people, declared President Ebert at Dr. Rathenau's funeral in the reichstag chamber yesterday, in eulogizing the dead statesman.

"The bullet which struck down Rathenau was aimed at the German republic," said the president. "It robbed the nation of one of her most loyal patriots, one of the ablest champions of German rejuvenation. This murder is a crime against our industrious, suffering, hopeful people."

The vicinity of the reichstag building was crowded with masses of workers observing the day's abstention from labor decided upon in protest against the crime. The prohibited zone near the building was heavily patrolled.

Up to the early afternoon no disturbances had developed.

# PRESBYTERIANS TO HOLD PICNIC

Members of the First Presbyterian church and Sunday school and their friends will gather at 3 o'clock this afternoon at the fair grounds for a picnic. According to Sunday's announcement a genuine picnic dinner will be served at 6:30 o'clock. The only stipulation is that each family bring enough food and dishes for themselves. Ice cream and lemonade will be served by the Sunday school. Games and a general good time have been planned for by the committee in charge. The men will go to the fair grounds as soon after work as possible.

It was also announced Sunday that Judge John M. McCourt of the supreme court will give a patriotic address on Sunday evening July 2, on "Law Enforcement." A week from Sunday, July 9, will be communion Sunday at which time new members will be received into the church.

The church's standing committee who are receiving gifts for the new church in the form of cash, property or bequests, are A. O. Condit, Mrs. George Pearce and H. V. Compton.

# CHARMING OLD DANCES REVIVED ON THE SCREEN

Among the most charming scenes to be seen in "Smilin' Through," the splendid First National attraction which is playing to capacity audiences at the Oregon theater are those in which Norma Talmadge, the star, and members of her company revive some of the beautiful old time English dances on the screen.

Norma, exquisitely costumed, dances an 18th polka, an English waltz and the old lancers with an appealing grace. The scenes of this moving and colorful photoplay, adapted from Allen Langdon Martin's famous stage production are laid in Ireland and England and Norma gives a wonderful performance of the dual role of Maudie and Kathleen.

The whole production is a masterpiece, made under the direction of Sidney Franklin, and is more fascinating and stirring than its highly successful predecessor on the stage.

# NEW ROAD TO OPEN YELLOWSTONE EARLIER

Missoula, Mont., June 28.—With the construction of the Lookout Pass road this season, the Yellowstone Trail highway through the St. Regis pass will be thrown open to traffic six weeks earlier each spring, according to Engineer Frank Andrews of the bureau of public roads. The contract for the work will be awarded this month so that work may start as soon as possible.

Each year the snow banks on the divide of the St. Regis Pass are a barrier to travelers during the spring months. The new road will be built with a southern exposure, assuring a much earlier opening, according to Andrews. The state of Idaho has already built a road up to the state line, but it cannot be used because the Montana section of 2.52 miles is not yet constructed. The new stretch of highway follows the Northern Pacific railway closely from the state line to Slides, where it connects with the present trail.

Contractors working on the east side of the Skalahe road out of Phillipsburg, will have several hundred men working on that job by the last of this month, though it is only a short time since the snow left the upper Rock creek drainage.

# IRISH FORCES ACT TO CURB

(Continued from Page One.)

occupied by irregulars, also was attacked by the Irish government troops. The number of casualties on either side was not known definitely but fourteen had been reported up to mid-noon.

# Artillery Is Used

Artillery was employed by the provisional troops, at least one 18-pounder having been in action, and considerable damage was reported to have been done the insurgents' stronghold. This had been strongly fortified by the irregulars, who replied vigorously to the fire of the attacking parties.

Machine guns were being freely used by both sides.

The entire city was awakened by the din, even to the remote suburbs.

# Ultimatums Sent

The attack on the insurgents was preceded by the sending of two ultimatums to Commandant Rory O'Connor. One of these demanded the release of Lieutenant General O'Connell, assistant chief of staff of the regular forces, who was seized yesterday by the insurgents. The other set a time limit after which an attack would be made.

Fire broke out in Fowler hall, under attack by the provisional government troops, shortly after noon.

At that hour it appeared that the irregulars holding the Four Courts had taken refuge in the cellar in the rear of that structure.

# Women Escape

Ninety-two women, occupants of a segregated district, maintained as a part of the Owl concern, escaped with their belongings, a few receiving minor injuries from the flames.

Liquor in the Owl cellar, valued at \$200,000, was saved when the sub-structure was flooded with water.

The proprietors of the Owl, Marvin Allen, Frank B. Beyer and Carley Withington, said they believed the fire was of incendiary origin.

As was the case last Sunday, when fire of undetermined origin caused damage estimated at \$400, have used it.

000, the lines of the electric company supplying Mexicall with light and power, were out of commission and the town was in darkness aside from the light from the fire.

# British Supply Arms

London, June 28.—(By Associated Press.)—It is believed here that the Irish regular forces under Michael Collins are sufficiently strong and well equipped to deal with the situation which has arisen in Dublin. A majority of their

arms, including machine guns and artillery, have been supplied by the British government under the terms of the Anglo-Irish treaty. They are manning their own artillery.

There are several thousand British troops still in Dublin and it is intimated that, should Collins request aid from this source, troops would be placed at his disposal, exactly as was done when the Ulster government desired military assistance in putting down the rebellion in the north.

# Women and Medicine

In Europe, years ago, a woman named Hildegard wrote a notable book on medicinal plants. In those days the men were too busy bothering about dogmas of religion and medicine, and the study of herbs was thought beneath their notice.

It was the women, however, who mostly conducted the hospitals and cared for the sick, and thus they learned much of great value. They let the men fight out the questions of theories.

Lydia E. Pinkham's Vegetable Compound, prepared almost fifty years ago by a woman, Lydia E. Pinkham, did then, and does now, relieve the ailments peculiar to women. It is a vegetable compound and of great value for this purpose. This is proven day after day, and in your own neighborhood, by grateful women who have used it. (adv)

No war tax on season tickets or single admissions. Reserved seats for season, \$1.00, now on sale at Hartman Bros. Jewelry Store.

The best Chautauqua program ever offered Salem Thursday evening at the tent on Willamette University Athletic field.

# "One weak spot and a whole new tire gone!"

The result of unseen "lumps" in the rubber

THE tread barely worn off—yet a blow-out ruins the entire shoe! What's the cause, you ask? You could actually see the answer to this question if you had samples of tire rubber under a microscope. In ordinary rubber compounds, the rubber does not mix smoothly and evenly with the necessary strengthening materials. "Lumps" are formed—every "lump" a weak spot that helps bring a blow-out like this some day. At last a rubber has been produced that reduces these "lumpy" formations to a minimum—that eliminates premature tire troubles. Four tire experts in the Thermoid Rubber Company discovered Crolide—an even-texture rubber that does not weaken with the stretching and straining that goes on inside a tire in use. Crolide Compound is today used exclusively in the manufacture of Thermoid Tires. You are invited to call and see these tires for yourself—also the famous Crolide Compound Tubes.
