All of these notaries were said to be involved in alleged irregularities in connection with the circulation of petitions for the initiation of the interest rate amendment, the fish bill and the grange income tax bill in which, testimony at the hearings revealed, signatures were certified to as those of qualified voters, when the notaries were not acquainted with the signers, and petitions were certified to in blank and the signatures affixed afterward.

# GIRLS SCHOOL BURNS

(Continued from Page One.)

able at the school was manned by the girls immediately after the first started but the flames crawled quickly on the roof and proved impossible to check. Attention was then focused on the furnishings and approximately \$8000 worth of equipment was saved.

Two trucks from the Salem fire department were rushed to the scene a few minutes after the fire started and Salem firemen rendered valuable assistance in finally checking the blaze. Fire fighting equipment from other state buildings was ordered to the girls' schools and many state employees assisted in the fighting.

In the meantime the city of Salem lay virtually unprotected in case a serious fire had broken out. But one truck and a small amount of hose would have been available. The fire broke out about 10 o'clock.

It was said this afternoon that a meeting of the state emergency board will soon be called with a view to providing funds for a new building. In the meantime the girls will be housed in the one building. Due to the fact that the heating plant was in the destroyed building the girls may experience some inconvenience for a time.
