

FRUIT GROWERS TO REQUEST AID OF LEGISLATURE

Fruit men of the state have gone on record in favor of asking the next legislature for additional appropriations in order that more scientific work may be done in the way of investigating and controlling fruit pests, according to Charles A. Park, president of the state horticultural board.

Mr. Park has just returned from Portland where he attended a meeting of horticultural experts from all parts of the United States who met to discuss ways and means of controlling the white pine blister rust. Also from Corvallis, where he attended the annual meeting of the state board of horticulture.

Mr. Park said that the agricultural interests of the state had received during the past four years from the legislature, appropriations amounting to about \$15,000 annually. But that during the past year or so there had been more insistent calls from farmers and fruit growers for help and more information in regard to fruit pests and the control thereof. These pests include not only insects, but fungus growths and larger amounts would be needed in the next few years.

As an economical proposition, Mr. Park is in favor of keeping the pests out of the state, rather than to spend money and labor after they have been found to be doing great damage to fruits and grains in the state. And to do this, larger appropriations would be necessary, he said.

was said that we entered the war to bring about the end of war."

General Pershing devoted most of his address to discussing the value of military training as a school of good citizenship, making reference of military training as a school of good citizenship, making reference in this connection to the findings of the recent educational conference in Washington. The conclusions of that conference, he said, were that the training given in reserve elements of the army and at civilian training camps "constitute an effective machinery through which much can be done not only to benefit the individual from the standpoint of his physique and self-discipline, but from the standpoint of his relations to the government that protects him and which he is under obligations to defend."

The chief of staff stressed again draft statistics that show 50 per cent of the young men called out during the war to have been physically sub-normal, largely due to defects curable by proper training; and that one-fourth of the persons examined were "unable to read and write our common language, and that more than 10 per cent can not even successfully speak English."

Losing National Balance.
"That means," General Pershing continued, "that some 10,000,000 (of the American people) do not know our tongue. We cannot avoid the conclusion that we are losing our balance and our own self respect unless we attack the problem vigorously."

"I do not advocate military training as a cure for all our civic ailments, but I firmly believe that it inculcates ideals of honor and duty in our young men that must constitute a valuable national asset."

WORN OUT AFTER SHE COOKED A MEAL

Took Lydia E. Pinkham's Vegetable Compound. Read the Result

Cincinnati, Ohio.—"I suffered for a year with nervous troubles and irregularities before I took Lydia E. Pinkham's Vegetable Compound. My back pained all the time and I was unfit for housework. I was worn out if I cooked a meal, and was unable to do my washing. My girl friends and my sister told me if I would take your Vegetable Compound and Liver Pills I would be relieved. After taking the first bottle I felt better, and neglected it awhile, but found I could not do my work until I was stronger. So I took the Vegetable Compound again and now I am the mother of a 19 months old boy. He is fat and healthy and I am sure I could never have carried him if it had not been for your medicine. I recommend your medicine to all women although I am young to be advising some one older."

FILBERT MARKET IN NO DANGER OF SLUMP IS BELIEF

Growers of filberts need have no fear about their markets for many a year, as at present this country imports about 20,000,000 pounds annually, the greater part of which comes from Italy, according to Knight Percy, who has been in the nut business a number of years.

Filberts are receiving special attention this year from many large growers who are putting in extensive acreage, Mr. Percy said. Isaac D. Hunt, vice-president of the Ladd & Tilton bank of Portland, has just recently planted 30 acres of filberts on his farm two miles from Newberg. Herman Abraham of Albany recently put in 20 acres of filberts on his holdings near that city. A 40-acre tract has been planted near Forest Grove, Mr. Percy said. But in the vicinity of Salem the majority of filbert plantings this fall have been from one to three acres.

Judging by the markets of the past few years and crops of filberts, Mr. Percy says an acre should yield from \$200 to \$250 annually, and much more after the orchards is ten years old or more.

This year some of the older orchards yielded about 2000 pounds an acre, and many sales were made in large lots at 20 cents a pound, according to Mr. Percy.

ONLY FOUR LOTS YET TO BE SOLD

The remaining lots in the Highway addition to Salem, adjoining the extension north of Capitol street to intersect the Fairgrounds road, are going fast, according to Fred A. Erickson. Lots were sold yesterday morning to Dr. H. E. Morris, Scott Page and T. M. Hicks.

There are now only four lots in the addition unsold Mr. Erickson said. He expects these to be disposed of within a few days, and as soon as this is done, the plat of the addition will be filed for record, and deeds given to those who purchased.

It is the plan, Mr. Erickson said, to pave Capitol street through the addition early next spring. Already plans are under way for the erection of a number of houses, as almost all purchasers of lots have bought with the intention of building.
