GOITRE VERY PREVALENT IN CITY SCHOOLS

From one-fifth to one-half of the pupils of Salem schools are afflicted with enlarged thyroid glands, commonly known as goitre, is the startling fact as revealed by Dr. D. R. Ross, school physician, through examinations which have been made in practically all of the schools here. Such is said to be the case in practically all localities of the northwestern states comprising Oregon, Washington, Idaho, Wyoming, Montana and Utah.

The cause of goitre is a question of wide difference among physicians, but it is generally agreed that it results from a lack of iodine content in the gland. When taken during the adolescent period simple enlarged thyroid glands can be completely cured with little expense and practically no inconvenience to the persons thus affected, Dr. Ross said.

Last evening at the meeting of the school board, Dr. Ross presented his statistics showing the result of his investigations and recommended that the board take some action to have goitre treated by the school. It was pointed out that the cost per pupil would not exceed 25 or 20 cents a school year. The matter of treatment was referred to Superintendent George Hug, who is to confer with the Marion-Polk-Yamhill Medical association and report back to the board with recommendations.

"This is a delicate subject and what action we take must be guided by the interests of the school children," Dr. H. H. Olinger chairman of the board, stated this morning. "We will confer with the medical profession and will do all within reason to remedy this affliction."

In making his investigation, Dr. Ross examined 2501 pupils. Seventeen per cent of the 260 boys in the grades from the fourth B to sixth A and 28 per cent of the 424 girls in the same grades were found to have enlarged thyroid glands.

Forty-seven per cent of the 501 girls examined in the junior high schools and 20 per cent of the 418 boys examined were thus afflicted, he said. In the high school 48 per cent, or nearly one in two of th girls had goitre while but 24½ per cent of the boys were thus afflicted.

The plan as suggested by Dr. Roberts for the supplying of the proper amount of iodine in the thyroid gland is the taking internally of specially prescribed iodine tablets about once a week. "When there is a sufficient amount of iodine in this gland, the enlargement will gradually reduced," Dr. Ross said.

NATIONAL LEAGUE TO REWARD BEST PLAYER

New York, Feb. 13.—The National league has followed its junior associate, the American league, in deciding to select annually the player most valuable in the circuit and to award him a token of $1,000 and a written estimate of his worth.

Owners of the National league teams made the decision yesterday and also agreed to forswear paying bonuses to players for batting, pitching or field excellence, though bonus provisions in contracts made up until yesterday will remain active, the bonuses for good conduct will continue to prevail.
