

### BEARCAT BABES ARE CHASTIZED BY SALEM HIGH

The Salem high school basketball team lived up to expectations last night and defeated the Bearcat Babes on the high school floor by a score of 33 to 24.

The freshmen gave the high school a good game and it was only in the last few minutes of the game that the ed and black five was able to force ahead by a safe margin. The Babes haven't a wonderful team but the high school did not play up to their usual form as they have not had much practice during the Christmas holidays. Salem was leading by a 12 to 11 score at the end of the first half. In the second half the Babes got to going and made several baskets, coming within a few points of the high school.

Numerous substitutions were made by both teams. Two of the Willamette freshmen were called out on personals. Salem had 12 fouls marked against them against 14 for the Bearcats. Salem made 14 free throws and made seven of them. Willamette scored six out of 12 free shots.

Sparks has a hard time making a winning team so he has all green men. Salem is to meet the Corvallis high school in their next game. Salem had hard luck in their shot last night, missing enough easy shots to double the score. They have had several easy chances in the last two games but have been excited and missed cinches.

The lineup for last night's game follows:  
Salem  
Ellis (5).....F.....(12) Litchfield  
Hoeman (5).....F.....(2) Winslow  
J. Draper (14).....C.....Scott  
Draper (11).....G.....(2) Fisher

### PARIS SWEEP BY GALE

Paris, Jan. 3.—The gale which swept Paris and northern France yesterday continued during the night, the velocity of the wind here reaching 100 kilometers (about 62 miles) an hour. Reports from Lorient say the steamboat Saturna broke in two and sank. At La Rochelle a smack went down after striking a rock and a sloop was crushed by two heavier sailing vessels.

Washington.—President a d Mrs. Coolidge received 4000 persons at the White House New Year's reception.

### WINS \$15,000 HOME

To Julia S. Groo, 18, of Portland, has been awarded the \$15,000 home given for the best essay on home lighting contributed by more than 1,000,000 school pupils of the United States. Miss Groo's prize winning essay follows:  
"We do not keep a horse and buggy simply because our father has one. Instead, we use the new and more serviceable means of travel. The man in the office, the factory manager, the contractor, all continually strive to find labor-saving devices. They do away with antiquated apparatus and replace it with machines for increasing output. Greater production by the individual is a demand of the times.  
"Yet when these same men reach their homes the thoughts of advanced methods and convenience seem left behind. They retain lighting equipment which was probably considered the best when it was installed, but which is now obsolete because of the developments in the industry and the knowledge of proper lighting learned from experience and investigation.  
"Careful thought was given to the lighting of our home, and has resulted, I believe, in our having a well-lighted home. It is well lighted since each fixture was selected to provide sufficient light where it might be needed. A center light gives general illumination, while portable lamps placed by easy chairs for reading or sewing bring the light directly where desired. A shade in harmony with the fixture and the room covers each bulb, but all are dense enough to prevent glare or eye-strain. Some are silk and some are parchment, each being adapted to its surroundings. The basement shades are metal.  
"Small bulbs are used in decorative lamps to prevent annoying spots; frosted bulbs, where there is a possibility of their be-

Miss Groo also won the \$200 cash grand prize in the Portland lighting contest. Her essay of 600 words was worth over \$25 a word to her.

ing seen with discomfort. Portable lamps are placed on each side of the mirror on the dressing table and brackets on each side of the bathroom mirror to illuminate the features on both sides, thus avoiding shadows. The shades prevent a bright light from being reflected into the eyes.  
"Each room has bulbs in excess of one watt to the square foot, and since the walls are light, very little light is absorbed by them, thus avoiding the necessity of

larger bulbs.  
"The center fixture in the living room has two 150-watt bulbs. There are two floor lamps and one table lamp, each containing two 40-watt bulbs. Two brackets over the mantel and two small decorative lamps each have a 15-watt bulb. Four single convenience outlets permit rearranging the furniture.  
"A fixture with four 40-watt bulbs hangs 25 inches above the dining room table, while 15-watt candles are at each side of the buffet. A double convenience outlet is under the table and another by the buffet.  
"Our kitchen is lighted by a 150-watt ceiling fixture with a 40-watt lamp over the sink. Appliances may be attached to a double convenience outlet.  
"Each of the two bedrooms has a 40-watt fixture, a 40-watt stand lamp each side of the mirror and a 40-watt lamp at the head of the bed. The three double convenience outlets make re-arrangement of the furniture easy.  
"The two 40-watt brackets by the bathroom mirror furnish sufficient light. The 40-watt center fixture is unnecessary because of the smallness of the room. The double convenience outlet is for appliances.  
"The base vent has 40-watt lamps in the trunk room, in front of the furnace and at the coal pile. A 100-watt lamp is over the laundry tub. A double convenience outlet is available for appliances. Two 40-watt lamps should be placed over the workbench to prevent shadows on the work.  
"Our long hall has a 40-watt ceiling fixture and a 40-watt bracket."
