## HOUSE LEVIES HIGHER RATES ON AUTO LINES

In the face of opposition from the house roads and highways committee the house this morning by a vote of 44 to 22 voted to concur in senate amendments to house bill 413 levying a high fee rate on buses and trucks operated as common carriers.

The senate raised the millage rate of three eighths of a cent a mile per passenger seat on buses and per ton capacity on trucks to three quarters of a mill on buses and 1 mill on trucks. The senate also amended the law so as to exclude all peddler's trucks, oil trucks, grocery and bakery trucks and others running outside of corporate cities from provisions of house bill 413 raising their rates.

The house roads and highways committee last night met to decide on what action it would recommend on the senate amendments. It voted to concur in the rate set upon buses but to oppose that set on trucks, holding that the one mill rate was prohibitive. The committee also decided to ask the senate to agree to classify peddler's and miscellaneous trucks used on the highways in house bill 25.

It is probable that the governor will veto the measure.

## "SPRING MAID" OPERA TONIGHT

The Brandon Opera company delighted another full house at the Grand Theater last night with "Bohemian Girl."

The music contains concerted and solo numbers that have been household songs since the days of our grandparents. Who is not familiar with "I Dream I Dwell in Marble Halls," "The Heart Bowed Down" and "Then You'll Remember Me?" all rendered to great applause last night.

The story of the opera is thrilling and romantic and full of dramatic situations. It reveals the true zesty life of middle Europe of a century ago showing the love and hate that swayed the feelings of these strange wandering tribes.

Tonight the taut and fascinating operetta "The Spring Maid" is given. It will be the last performance of the engagement.

## HOME TRAINING NEED OF BOYS

"It is time that we were using more intelligence in our training of boyhood," said President E. C. Hickman of Kimball school of theology in an address before the Salem Kiwanis club this noon. "There are too many of us fathers who think that when we give our children enough to eat and provide them with some of the other material necessities of life we have done our duty by them."

## MORE PAVING SOUGHT THAN IS POSSIBLE TO LAY

Petitions for street improvements have been showering in for action by the city council so rapidly that the street improvement commission met last night to determine what means could be taken to satisfy the demands.

The purchase of a three-sack mixer has been virtually decided upon, but there is some debate as to the advisability of keeping the two-sack mixer now owned by the street commission and working the two in conjunction, in an effort to lay the pavements wanted this summer.

Payment need of South Salem will be met first, agree members of the commission, due to drainage conditions. Work is possible there by the first of May, while in North Salem the property holders will be obliged to wait until the latter part of July, as the ground is not sufficiently dried out before that time to permit of constructing a foundation.

The present facilities for paving, owned by the city, cannot meet the requests of 113 blocks of property holders for pavement this year, asserts Mayor Giegy. Some of these blocks were held over from last year. Seventy-eight blocks in all were paved last year, according to W. S. Lowe, street commissioner, but 24 of those blocks were covered with blacktop by the aid of county equipment.

A well defined sentiment against the laying of any more blacktop pavement has developed in the street improvement commission and in the city council. Should any of this year's paving work be let out on private contract, it is almost certain that the contract will call for concrete pavement, says Mayor Giegy.

With the purchase of a three-sack concrete mixer, 20 more blocks of concrete pavement can be laid than were laid with the two-sack mixer last year, avers Commissioner Lowe. Even with this increase, however, the work will fall far short of demands.

In all fairness, the paving should be done in the order of the filing of the applications with the city council, says Mayor Giegy. In some instances the terrible street conditions existing make immediate improvements almost necessary, the mayor believes, and it is for the benefit of persons on these streets that some consideration is being given to allowing these persons to get the work done by outside contractors.

It is feared that the high standard set in the last few years by the street commission in laying permanent pavements, will be a hard mark for private construction companies to hit, however, and still make the profit required.

It has long been recognized that the most effective way to treat colds is to apply the medication directly to the affected parts. This of course can only be done by means of vapors that can be inhaled.

Vicks provides the ideal method of securing medicated vapors. When rubbed over throat and chest the ingredients—Menthol, Camphor, Eucalyptus, Thyme, Turpentine—are vaporized by the body heat and inhaled directly into the air passages and lungs.

At the same time, Vicks is absorbed through and stimulates the skin like a poultice or plaster, affording a double action which brings truly remarkable results.
