The mild acid juice found in Cranberries seems to kill the tiny skin parasites which is the direct cause of Eczema and most skin irritations. With the cause removed, the healing takes place quickly. Hearts and Dollars

Two Statements—one of which has to do with Health and Welfare, the other with Financial Strength

AN OPEN LETTER (Name on Request)

MR. HALEY FISKE, President METROPOLITAN LIFE INSURANCE CO. NEW YORK CITY

My Dear Mr. Fiske: Why don't you publish a Heart Statement along with the regular Financial Statement you put out each year? Any company can publish impressive figures of financial strength, financial growth, etc. But figures don't stick. All I remember from your last year's Statement is that the Metropolitan has several million policyholders and is the biggest life insurance company in the world. I've been following some of your magazine

advertisements lately that tell of work you're doing to help people live longer. It isn't entirely clear in my mind just how you're doing it or why you do it, but since you are doing it, give us the facts and figures on that. Call it a Heart Statement or a Welfare Statement, or anything you like, but—give us the facts.

Perhaps other Metropolitan policyholders like myself would be interested in a Statement of that kind. Very truly yours, C. N. S.

While the average life span in the United States is 51 1/2 years greater than it was 12 years ago, the life span of the Industrial Policyholders of the Metropolitan increased nearly 8 1/2 years—a betterment of three years over the general average—in the same interval.

These increases in longer life are due in large part to the Metropolitan's Health and Welfare Work among its policyholders.

You are the gainer You and all the other 22,000,000 policyholders—one out of every six people in the United States and Canada—reap the benefit through better health and decreased cost of insurance.

The wealth of the Metropolitan belongs to you and to no one else. The Metropolitan has no stock and no stockholders. It is owned solely by its policyholders. You, as one of the policyholders, share in the ownership of all its investments; in its railroad bonds, its real-estate mortgages, its loans to farmers, loans to states, cities and towns for public improvements and similar enterprises.

You, as a part-owner of over \$1,600,000,000, should read the two statements on the left with a feeling of pride in what your company has achieved.

The efforts as well as the assets of the Metropolitan are dedicated to protection against future want—to greater happiness, better health and longer life.

Haley Fiske, PRESIDENT
