A communication from Mrs. Amos A. Friss, 3205 Woodley road, Washington, D. C., national chairman of publicity of the Daughters of the American Revolution, especially points out Oregon's work in marking her historic landmarks. Mrs. Friss' communication to the daughters reads as follows:

"Washington—The Daughters of the American Revolution are about to launch a campaign of education on the historic spots of each state, as one of the best modern methods of teaching history, according to a statement just issued by Mrs. L. S. Gillett, national chairman of the preservation of historic spots.

"They expect to call on the chambers of commerce and the state automobile associations to assist by directing the attention of the traveling public to these spots and to mark them on the road maps that the motorists may reach them with the least difficulty."

"Properly marked and kept up, the historical spots become an asset to any state," Mrs. Gillett declares.

"A number of states have already realized their value. Oregon is proud of her history and has made her historic sites accessible to all; California, long ago saw the value of her old Spanish missions; Tennessee has for years made object lessons of her historic spots, and Colorado has been recently awakened to her interesting landmarks.

"While the Daughters of the American Revolution for many years have been marking historic spots made sacred by the war for independence, they lately have extended the scope of their work to catch up and unify all the points of American history to give a panoramic record of the past.

"Many who now tour through New England during the summer visiting the sites of battlefields and historic incidents of the revolution should be encouraged to come south later in the season through Valley Forge, Wakefield, Mount Vernon, Yorktown and through the Carolinas and Georgia.

"It is the hope of the society to have the route marked west thru the trail made by Washington in the French and Indian war, linking up the historic sites in Ohio and Indiana, thence over the path of Lewis and Clark, the covered wagon and the Santa Fe trail, thus making visible the outline of our history and the migration of the American people.

"Since one of the principal objects of our society is to encourage the study of American history, we are stressing the employment of visual education methods and the chairman urges each state to bring to its own people knowledge of its own history, that all may appreciate the fortitude and perseverance of the sturdy pioneers and the heritage they left us."
