## SHEAN TELLS OF RELATIONS WITH MURDER SUSPECT

Hartford, Conn., Mar. 31.—(By Associated Press.)—Walter E. Shean, son of a wealthy Springfield, Mass., family, the state's principal witness against Gerald Chapman, charged with the murder of Patrolman James Skelly during the looting of a New Britain store last October, took the stand today for cross examination.

Shean, obviously nervous and answering questions hesitantly, said he had met Chapman, known to him as Waldo W. Miller, by the latter's telephonic appointment.

"Chapman told me he was a friend of George Brown's," said Shean. At this point Frederick J. Groehl, chief counsel for the defense, brought out that Brown was a known "peter man" or safe blower who now is in the federal prison in Atlanta, Ga.

Shean said he met Brown four years ago and knew him for eight weeks when he disappeared. He had not seen him since he said. Yet, he admitted, he had accepted Chapman in friendship, although he knew Brown was a crook.

Shean admitted he had had trouble over a stolen bond case. Joseph Marshall, a Springfield race bookmaker, he said, told him that he had \$100,000 worth of stolen bonds and asked Shean to help him dispose of them. Shean said he "retailed" Marshall until he had time to telephone the department of justice at Washington to inform that bureau of the stolen bond offer. A government operative called on him, but Shean had neglected to get Marshall's address and the bonds never were recovered nor was Marshall arrested.

## FILTER MAKES X-RAY HARMLESS IS CLAIM

Paris, March 31.—A filter, which it is claimed will make X-rays harmless and cure radiodermatitis, the disease which has mutilated or killed many scientists using the rays, was described to the academy of sciences last night by Daniel Bertholot. The filter is the invention of two French scientists, J. Risler and P. Mondain.

The inventors had the idea of using the antagonism of the infrared rays towards the radiation of shorter wave lengths. Living tissues exposed to X-rays and then exposed to the action of the infrared rays, showed no signs of radiodermatitis nor any essential modification. The inventors further claim to have cured persons suffering from radiodermatitis after three or four applications.

After living the life of a tramp he found his mother seven years after leaving the orphan's home. Soon, however, he landed in the state reform school at Miles City where he remained two years.
