## PROTEST ACTS OF WATER BOARD AT SILVERTON

Silverton, April 9.—At the regular meeting of the Silverton city council a remonstrance signed by 109 tax payers protesting against certain acts done by the water commission, was filed. In their remonstrance the petitioners complained that the water commission had increased the salary of the superintendent from \$150 to \$200 a month, when a competent man could be had at \$125 a month. The petitioners also stated in their petition that the present water superintendent had been negligent of his duties. The petition had been offered at the former meeting of the council but had been ruled out of order on the ground

that it should have been presented directly to the water commission. The attorney appearing as counsel for the tax payers, in his argument to the council, called its attention to a section of the city charter which made it the duty of the city council to fix the salaries of all officers provided for in the charter. The attorney also directed the attention of the council to the provisions of the charter which made it the duty of the council to appoint the water commission and also giving the council the sole right to remove the commission. The attorney argued at the Monday night meeting that for this reason it was the duty of the council, upon receiving notice of transgression in office on the part of the water commission, to investigate such charges, and, if necessary to protect the interest of the tax payers, to remove the commission. As the water commission is a separate body from the city council, the council could not act on the matter but referred it to the water commission. Alfred O. Nelson appeared as attorney for the petitioners.

**Croup Relieved Without Dosing**

Too much dosing is harmful to a child's delicate stomach. Often it lays the foundation for ill health in later life.

The next time a child seems croupy in the evening apply Vicks over throat and chest and cover with a warm flannel cloth. Leave the bedclothing loose about the neck so that the arising vapors may be freely inhaled. This usually prevents a night attack.

If croup comes on without warning an application of Vicks usually brings relief in 15 minutes.

Vicks can be applied freely and often, even on the youngest child with perfect safety.
