An honest man's word

More than three hundred years ago, Miguel de Cervantes said: "An honest man's word is as good as his bond." Advertisers must be honest if they would remain advertisers. Their announcements are signed. They must tell the truth in their advertising. For their own protection, as well as yours.

What would it profit a man to advertise "Pure, virgin-wool suits" only to have you discover they were shoddy? You would never deal with that man again. And, further, you would tell all your acquaintances what a skinflint he was.

As a matter of business, if not of personal principle, an advertiser must tell the truth in his signed announcements. That's what makes the advertising columns of this paper such reliable guides to honest merchandise. The printed announcements are bonds between you and the advertiser.

Read the advertisements. Read them regularly. To be informed on the newest and best in everything. To save hours of shopping. To make the family purse do a bigger, better job. To get goods of known quality at the most attractive price.

You would not plan a motor trip without first consulting road-maps and guide-books. Is it logical to plan a shopping trip without first consulting the advertisements? Read the advertisements. Then go to the stores with your mind more than half made up.

A signed advertisement is, in effect, a sealed bond between you and the advertiser
