### SLUMP IN WOOL PRICES PUZZLE

London, May 7.—(By Associated Press)—The remarkable slump in wool prices is attracting attention, the price having fallen about 40 per cent in four months without much apparent cause.

The buyers, it is said, miscalculated the rate of consumption and consequently have many thousands of bales on hand, but not enough to account for the slump.

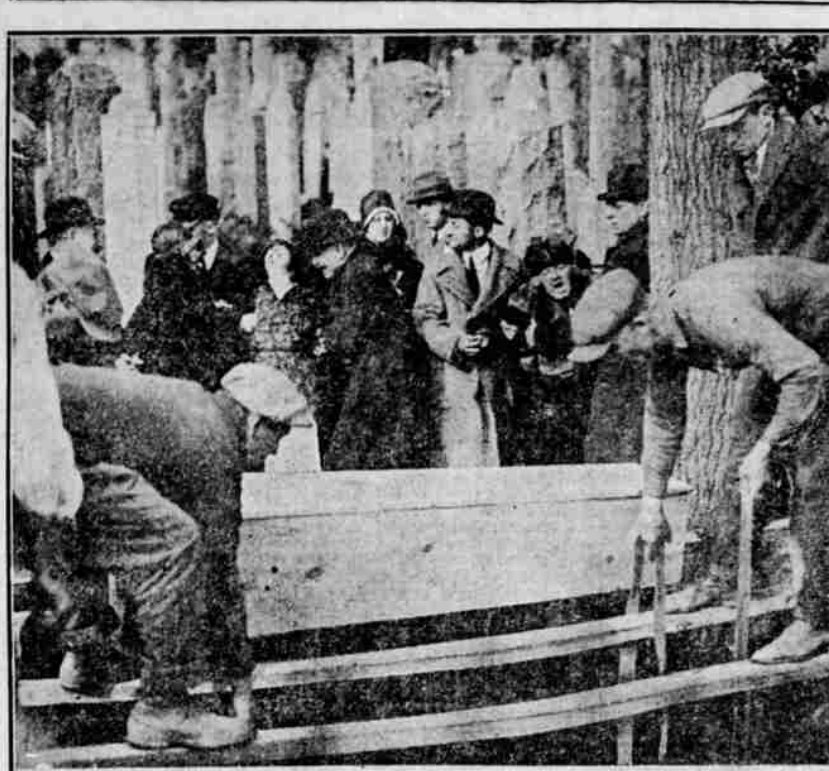

Sei Arthur Goldfinch, director of war materials during the world war, and an authority on wool, is quoted by the Daily Mail as saying that the slump is very small as compared with the average consumption, but that owing to it something like a panic now is occurring.

The Melbourne correspondent of the Daily Telegraph reports that a council of Australian wool brokers unanimously resolved yesterday that it was desirable to suspend all wool sales throughout Australia until July 1 and it was actually decided that there should be no sales in Australia for a week.

### Mother Crazed at Slayers' Graves

TRAGIC BURIAL OF ELECTROCUTED DIAMOND BOYS

One of the most pathetic pictures ever made is this, depicting the greatest agony a mother could bear—witnessing the burial of two sons who were electrocuted for murder. In the little Hebrew cemetery in New York City in a drizzling rain, two rabbis intoned the burial ceremony for Joseph and Morris Diamond, executed for the murder of two bank messengers. Their families were greatly respected. The mother (right), after the ordeal of saying goodbye to her sons in the Sing Sing death cell the previous night, suffered a complete mental collapse at the funeral and, screaming incoherently to her dead boys, had to be forcibly restrained from leaping into the graves. Her daughter, Sally (left), who raised funds and sought out witnesses to the moment of execution in attempt to save her brothers' lives, also struggled to cast herself into the graves.

### PERMIT FOR RAILROAD IS APPLIED FOR

(Continued from page one)

**Eureka Line Rumored**  
Eureka, Cal., May 7.—The expenditure of approximately \$250,000 for thousands of acres of land in the Klamath river region within the next few weeks, which became known here yesterday has given rise to the belief in many quarters that it presages the extension of transcontinental railway lines from Reno, Nev., to Eureka, Cal., where they will join with the line of the Northwestern Pacific Railroad company.

The proposed extension, it was reported here last night, would be from Reno and thence to Klamath Falls and Hornbrook and Eureka. The purported holding company is the California City & County Land company of San Francisco. The prevailing opinion here is that the interest behind the acquisition of the land is the Chicago, Milwaukee & St. Paul Railroad company. Most of the property has been transferred to the California City & County Land company.

The purchased properties included the D. M. Horn ranch, the Robert J. Ferral ranch, the Cook and Smith ranches and thousands of acres in the Weyerhaeuser Realty company's holdings.

**Esnee Given Credit**  
Portland, Ore., May 7.—Well-informed Portland railroad men say the consistent interpretation of the Yreka report is that the Southern Pacific contemplates extending a branch from its projected Modoc northern line along the northern slope of Mt. Shasta to the Southern Pacific main line and building from Hornbrook on the lower Klamath river to Eureka, connecting there with the Northwestern Pacific. Such a route would give direct connection with middle western and eastern markets for lumber and other products of northwestern California.

The Modoc Northern will be the Southern Pacific's shortest line from Klamath Falls, Or., to the east via the Oakland-Ugden route. It is inconceivable say local rail experts, that the Chicago, Milwaukee & St. Paul, now in receivership and without a mile of track south of the Columbia river will be considering any construction in California. The Northwestern Pacific is owned jointly by the Southern Pacific and the Santa Fe.

### WILLS MADE IN AIR LEGAL IN GERMANY

Berlin—Wills may be made legally in airplanes, according to Dr. Goldman, who contributes an article to the Deutsche Juristen Zeitung in which he discusses the making of last wills and testaments in midair.

Under the German law a German citizen may make a legal will in either a German or a foreign aircraft. He must write and sign it himself. It must be indicated what ship the document is written on, but the actual position of the ship need not be indicated. For example, it would be sufficient to write "On Board Z113 on the way from Friedrichshafen to New York."

### BRITISH TRADERS WANT NO LOANS

London, Eng.—Several millions of pounds sterling are waiting at the department of overseas trade for British traders to borrow, but they do not come forward. The department has authority, under the export credits scheme initiated three years ago, to finance traders in the export of goods for any sum from \$50 upwards, and although several millions have been lent for that purpose there are many more millions available.

### ALL FINNISH WOMEN ORGANIZED TO FIGHT

Helsingfors, Finland—Two hundred thousand Finnish women are organizing into Finnish syndical clubs, auxiliaries to the voluntary military organizations of men, and are in constant training to support the standing army in cases of emergency. The women are organized on a military basis and participate in the maintenance of the volunteer forces so that they may be prepared to carry on all work for which women are qualified in time of war. During the drills the women wear caps, gray garments and sleep on straw, just as the men volunteers do, so as to accustom themselves to the hardships of military service.

tory of any such asphyxiating, poisonous or other gases and all analogous liquids intended or designed for use in connection with the operations of war." The article said.

Mr. Burton also submitted an alternative text as follows: "To the end of lessening the horrors of war and ameliorating the sufferings of humanity incident thereto, the high contracting parties agree to control all asphyxiating, toxic or deleterious gases and all analogous liquids, materials and devices manufactured and intended for use in warfare, under adequate penalties applicable in all places where such high contracting parties exercise jurisdiction or control."

Washington, May 7.—The proposal for a prohibition upon exportation of poison gases for war use, made by Chairman Theodore E. Burton of the American delegation to the Geneva conference on traffic in arms, carries a step further the purpose of the treaty framed by the Washington arms conference and ratified by all of the five signatory governments except France. ### SOAKING RAIN BRINGS JOY TO GRAIN GROWERS

Pendleton, May 7.—Rain that started falling before daylight this morning was continuing lightly but steadily throughout the later morning hours. The moisture is invaluable to range and wheat lands, according to local authorities and comes at a time when precipitation is badly needed.

Walla, Walla, Wash., May 7.—Thoroughly soaking the grain and garden lands of southeastern Washington and northeastern Oregon, a steady rain general in this section, began falling before dawn and is continuing this morning. Farmers in the city today stated that it would greatly benefit the growing crops, especially the record acreage of spring sown wheat which requires more moisture than the usual winter sown fields. "Another such a rain as this in the next month or six weeks and we will harvest a bumper crop," said J. C. Scott, farmer and grain buyer today.

Bend, May 7.—A shower of hail fell for several minutes here this morning turning to rain which continued for a quarter of an hour. A short sharp electric storm came up late yesterday afternoon but no rain fell during the night. A fall of 11 inches of rain fell during the 12 hours ending at 8 o'clock this morning according to the government weather observer. This is the first rainfall this month.

Eugene, May 7.—After a week of record breaking warm weather, a light shower fell here last night, and was followed this morning by an occasional misting. The temperature dropped appreciably.

Other, as endless streams of fair women descend. They consisted of the exquisite "corps de equitriens" which is made up of 100 beautiful and daring riders, and 100 handsome, naturally gold-colored dancing hooves. With animal trainers began pouring out from the long line of coaches to direct in the removal of their "jungle" pets.

Stalking majestically, silently down the railroad tracks marched a large band of Indians with war-painted feathers. Three tribes from Nevada, Arizona and New Mexico were represented in their midst. They, too, will take part in the colossal feature which heralds the opening of the circus program.

Out at the show grounds the great stretches of canvas loomed in taut silhouettes almost before the early rays arrived on the scene to watch the ever fascinating work of pitching the big-top. Before many, who had heard of the circus arrival, appeared on the grounds, the monster tent had been erected with startling speed.

The performance, opening at 2 and 8 p. m. with the sensational, historic feature, "Focahontas at the Court of Queen Anne" in which divas, chorus and a ballet of one hundred former motion picture girls enact the story of Captain John Smith's adventures; the subsequent marriage of Focahontas to John Rolfe, and her presentation to the queen of England, against an early American background of hundreds of full-blooded Indians, is a succession of thrills and replete with splendor.

Wild and domestic animals performing "hair-raising" feats, follow in succession in the 110 big arena displays—three acrobatic animals, two rings, two staves and a hippodrome track filled with astounding animal acts of the celebrated A. G. Barnes quality.

Lotus, biggest and only performing Hippo will entertain the crowds. The "Equine Ballet" of one hundred girl riders and high school horses will prance before an appreciative audience. Rajah, the wrestling tiger; Samson, aerial lion and scores of other mighty thrillers by the greatest group of lions will follow.

Then will come the Royal Bengal tigers, polar bears, grizzly and Russian bears, pumas, jaguars, sea lions, seals, zebras, hippopotami, hyenas, kangaroos, baboons, llamas, yaks, dromedaries, camels, elephants, harte beastes, chimpanzees, choetas, orang-utangs, and other wild and domestic animals ever seen under canvas.

And last, but not least, will come the greatest movie-star of them all—Joe Martin. He is worth the price of admission himself, according to his estimation of his artistic talent. It's simply the show that's different—and more gorgeously bigger every year.
