10-Day Tube FREE

**Mother! Be sure you get Pepsodent for your child's teeth**

Do you want your child to have prettier teeth now, and better protection from tooth troubles in later life?

Mail the coupon then for a 10-day tube of Pepsodent, free. See what the world's leading dentists urge mothers to use as modern science's latest attainment in tooth care.

You will notice a film on your child's teeth. That's a frequent danger sign — an invitation for tooth troubles. The same stubborn film that you can feel by running your tongue across your own teeth. You must combat it. Ordinary dentifrices don't fight it successfully. Harsh, gritty substances are injurious to enamel.

Film is the greatest enemy of tooth health. It clings to teeth, gets into crevices and stays. Germs breed in it. The acid that leads to early decay forms. Old type methods failed to combat it. Men of science engaged themselves in discovering an effective combatant.

Now in Pepsodent, two new combatants are embodied—combatants approved by highest dental authority. It curdles the film, then gently removes it. It keeps the teeth whiter, cleaner, more sparkling. It is the modern scientific method for better tooth protection. Insist upon it. Get a tube today. Mail the coupon.
