

LOCALS

Credible work is being done by the Oregon state school for the deaf and its administration is efficient, but the plant needs enlarging to care for its population adequately, according to Prof. Herbert E. Day, representing the national research committee of the American Academy of Science. About 25 typical deaf institutions of the United States are being investigated by the committee. Pupils in the schools are subjected to a series of tests.

Special note. We find on re-checking our stock of water sets that we will not have enough to cover our Saturday special but as an extra value to overcome the error we will sell salad and berry sets of the genuine Homer-Laughlin ware. They consist of one large bowl and six small dishes that will find some place on the table almost every day. We are making this special offer for Saturday at 98c. Giese-Powers, 117.

DEBT ISSUE TO BE STUDIED BY FRENCH LEADERS

Paris, May 14.—Finance Minister Caillaux and Foreign Minister Briand were authorized by the French cabinet today to study the international debt question in an attempt to find an acceptable solution.

The decision of the cabinet was given out officially after long discussion of the problem of opinions of both M. Caillaux and Briand on what they thought should be done.

Finance Minister Caillaux expressed the view that the international debt problem must be solved and he told the finance commission of the chamber of deputies on his recent appearance before it that part of the Dawes reparations plan receipts must be devoted to this purpose immediately, even though France were hard pressed for money.

M. Briand, as foreign minister, is known to have been considering the debt question as part of his foreign policy and although his views have not been revealed it was said recently in authoritative quarters that the negotiations for settlement of the debts to the United States would be resumed during the present month.

The American government has made it so clear that the negotiations, when they take place would be in the hands of its debt fund commission that it is felt that diplomatic exchanges must be made in Washington rather than in Paris.

Edward Ostrander, the only member of the public service commission who was here today, said that no request had yet been received from the interstate commerce commission for the Oregon application to hold a hearing on application of the Oregon Trunk for an extension from Bend to Klamath Falls, or an arrangement for joint use of the Southern Pacific company's Eugene-Klamath Falls connection, already constructed. HISSES FOR EVOLUTION ARGUMENT

(Continued from page one)

Before the brush with Cassidy Mr. Bryan said to another student, William G. Chase, "I am sorry for you and ashamed of you."

Chase, embarrassed, had answered, "no," when Mr. Bryan asked, "Then you don't believe in the Bible?"

Mr. Bryan declared that real science cannot conflict with religious teachings, but said that evolution is not truth. Its exponents, he asserted are enemies of all religion, not only Christianity.

The question asked by Mr. Cassidy was:

"Is it possible that there may be philosophy gained by evolutionary thinking which presents a worship and reverence for future generations as an ideal and looks toward the development of heaven upon earth through the use of science; and is not this ideal a fine and worthy one, capable of producing a not less noble standard of morality?"

Boston, May 15.—(A. P.)—Denial that he had heard any booning or hissing when the question period following his talk on science and religion was terminated at Brown university in Providence last night was made by William Jennings Bryan when he arrived here today. He declared that he had, for nearly an hour and a half been answering questions and that most of the audience had left owing to the late hour, when the incident occurred. He said that he had answered several questions put by his interrogator and that only when his questioner showed a disposition to present his own views and argue instead of asking questions did he offer to turn the meeting over to him.

Similar action was taken by the managers of the Standard Oil and Sinclair stations, located nearby. All these stations are within a block of the end of the government bridge and have been doing a heavy business with Iowa motorists since the gas tax went into effect April 15.

Ray Johnson, Iowa's state treasurer, under whom the "gas marshals" operated, is reported to be in the city, actively in charge of the gas war, which it is reported is to be waged in all border cities.

Davenport, Iowa, May 15.—Stationing of representatives of the gasoline tax department of the state of Iowa at gas filling stations in Rock Island, was for the purpose of obtaining information on the amount of gasoline being "bootlegged" into the state and there was no attempt to stop sales of gasoline to Iowa motorists. Ray Johnson, state treasurer said here today.

Mr. Johnson came here with eight men to investigate rumors that an immense amount of gasoline was being brought across the Mississippi, tax free. During the morning his representatives checked up on Iowa cars stopping at Rock Island gas stations and endeavored to learn how much gas was being brought into the state.

Plans for the conference are under way and invitations will be sent out within a week to more than a hundred persons. Mr. Lee said.

John Johnson of Portland was arrested last night on two charges, one of drunkenness and another of possession of intoxicating liquor.

George Johnson, 1560 South Summer street, was arrested last night for riding his bicycle without lights.

A Dayton bicycle found by Officer Victor last night on 12th street near the Oregon Packing company plant is held at the police station.

A petition for the improvement of Richmond avenue from State to Oak street has been filed with City Recorder Poulsen for the attention of the city council at the next meeting. It is signed by Dwight B. Talbot and 21 others and is one of the biggest petitions ever received by the council.
