

# TOWN BUILT OF TIN CANS BURNS TOTAL LOSS \$15

Diabe, Ariz., May 26.—Work of rebuilding its dwellings of tin cans, a Mexican colony near here, today, all because of the antics of a vagrant cow who wrought havoc to the village in emulating the bovine of Chicago fire fame.

The Tin Town was destroyed, like the disastrous Chicago fire, is supposed to have started yesterday when a cow wandered into the kitchen of a house and kicked over an oil lamp. There being no fire fighting equipment in the village, one entire block was razed. The damage amounted to \$15.

Tin Town is inhabited solely by Mexicans of the poorer class, who have built their homes from tin cans, bits of junked automobiles and anything else that could be tacked or glued to railroad ties that form the framework.

## WEDNESDAY DERBY DAY

London, May 26.—(A. P.)—Tomorrow is derby day and tens of thousands of Britishers are eagerly canvassing the probable results of the mile and a half race over the historic course at Epsom Downs.

There is little to guide their choice. It is generally admitted that the horses this year are below the highest standard and there is no outstanding favorite. The betting, however, favors Lord Astor's Cross Bow at odds of 5 to 1.

Lord Astor has thus far been unfortunate in his efforts to win the derby, his horses having run second five times within the last seven years.

But it's nasty stuff—vile and hard to take and often upsets the stomach.

So pharmacists are advising and hundreds of thousands of people are using McCoy's Cod Liver Oil Compound Tablets—as easy to take as candy.

So if any one from Grandma down to two year old Jimmy isn't so strong as they should be, or weigh as much as they should ask J. C. Perry, Central Pharmacy, Dr. J. Fry or any druggist anywhere for a box of McCoy's Cod Liver Oil Compound Tablets—59 tablets—60 cents.

## THE HISTORY OF CHIROPRACTIC

The idea that disease was caused from displaced vertebrae pressing on the nerve cables which branch off from the spinal cord was advanced by D. D. Palmer in 1895. Dating from 1901, B. J. Palmer, his son, has developed it into the science, philosophy and art it is today.

The name given it, Chiropractic (KI-RO-PRAK-TIC), was the thought of Rev. H. W. Wood, of Monmouth, Illinois, who still resides there.

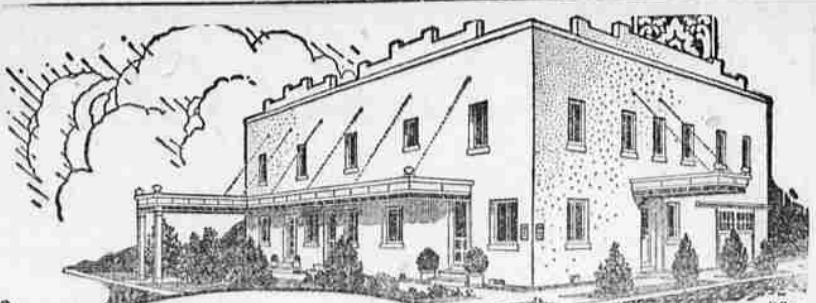

It is derived from the Greek and means "Done by hand," and the competent chiropractor uses nothing but his bare hands.

Chiropractic proved itself through results, and results established the facts. Results, and results alone, have made it possible for Chiropractic to become known so widely.

Consultation and spinal analysis free.
