MRS. OSCAR F. BORGELIN, Forest City, Iowa. "My first child died only a short time and I was sick for a year after. When I bent over and raised myself up again I could almost scream with pain in my back. One day I was so bad that I had to leave my washing and get ready to go to the doctor. He gave me medicine, but it did no more good than if I drank just water. Once when we had been in town a little while talking about Lydia E. Pinkham's Vegetable Compound was left in our car. I have taken five bottles of the Ve-

NEW MACHINE BRINGS SLEEP IN 10 MINUTES

London.—Only the old-fashioned folks will go on counting phantom sheep as an inducement to sleep if half of the claims are realized of the inventor of a new machine designed to relieve insomnia victims of all their bothers.

This novel contrivance which was recently patented by a young Cheshire inventor after four years of experimenting, represents an attempt to adapt the science of chromopathy, or relief by colors to the treatment of sleeplessness. The user of the apparatus, upon going to bed, places the sleep producing machine, which in many ways has the appearance of a wireless receiving set, upon a nearby table, and proceeds intermittently at a switch which is held in his hand. This causes rays of 12 different colors to flash from the machine in a pre-arranged sequence, and it is the effect of this combination of colors upon the retina of the eye that is supposed to induce sleep for even the most restless persons.

Many stubborn cases of sleeplessness are declared to have been overcome in periods varying from 10 to 15 minutes, and furthermore, the inventor contends that by the use of his apparatus he is easily able to put an ordinary person to sleep at almost any time during daylight. The rays have no ill effect whatever, says the inventor, on the eyelight.
