Bowls and baskets of pink sweet peas were arranged about the living room and a color note of pink was carried throughout. During the evening the guests presented a lovely leather bag to the hosts on their "leather" wedding anniversary.

## Dr. Sperry Describes Quake Effect

Dr. Myra E. Sperry, who more than twenty years ago was Salem's only woman photographer, and who has many friends among the older residents of Salem, has written to a Salem friend of her experiences in Santa Barbara since the quake. For nearly twenty years Dr. Sperry has made her home in Santa Barbara where she is a doctor of osteopathy. Her father, who died here several years ago, was well known in the county.

Excerpts from her letter, dated at Santa Barbara on July 8, follow:

"I am very sorry that the quake had to occur, but as it had to, I prefer to have been here when it did. It has brought out courage and heroism in a large measure. One man turned off the electric switches with bricks from the walls raining down on him, and the same service was performed at the gas plant, and at the same risk. Water was shut off only a short time, in fact I did not miss it. I believe this is the first great quake to escape a disastrous fire, and we are so thankful for it. We had telephones on Tuesday, but only part of the people have electricity, the greater part however. No one has gas yet, as there are still breaks in the mains to be repaired. As we were on the San Marcos transformer we have not electricity yet. We are cooking on a gasoline camp stove, but only felt safe to do so the last few days. Had coffee made on a gasoline blow pipe belonging to a plumber on the next block, and then used a furnace. A woman built a half block from here and we furnished our own wood and cooked there. Many people are sleeping in tents, but I have felt my house to be very safe and have staid right here except when away to see patients, or on other business.

"Many of the business houses are opening, either in their old quarters, new ones or temporary ones. My banking was done in a tent. The old part of the Arlington, which was frame construction, faced with brick and cement outer coating, still stands and is occupied now. The two who lost their lives were just below a tower in which was a water tank which fell carrying walls with it, and forming a huge pile of debris. It was very light here that night, as the Lucky studio sent up a big light and generator to light the workmen. (Seeking the bodies.)

"By afternoon of the terrible day, bankers were working upon plans for loans for rebuilding, and the banks of S. F. and L. A. were offering great sums. While great damage was done across the street and all around me, my house suffered little damage, principally the chimneys which were thrown down all over town. Canned fruit, chemicals, vases and so forth, to the amount of three tubs full had to be taken out before we could move around.

"I know you want to know the sensation that we had. I was sound asleep, and when roused my house was being shaken as a vessel shaker a rat. The din was so great that I could not distinguish separate sounds like vases and jars in the room with me.

and chimneys falling just outside the window. The squeak of the writhing house could be heard though as it was so different from the grinding roar. A second followed in a few seconds, and small tremors the rest of the day, in fact there have been slight tremors up to yesterday.

"We hope we are through with even the tiny ones through now. "Just think of this great destruction of property, and only eleven lives lost!"

By the erection of a national memorial home, which will be opened in Denver next September, the American war mothers are doing an important work, according to Mrs. Marguerite N. McCluer, president of the national association, who arrived in Portland today.

"Denver is the site of the large Fitzsimmons government hospital," she said, "and the war mothers are providing a home for the mothers and sisters of the disabled veterans that will be close to the hospital.

"Many of the war mothers anxious to see their boys, go to Denver with insufficient funds. The new memorial home will provide a reasonably priced hotel and will also furnish the convalescent soldiers with a recreation center and perform much the same service as the hostess house during the war."

Mrs. McCluer also told of the Disabled American Veterans' convention which she recently attended in Omaha. "The most impressive thing to me," she said, "was the squadron of blind veterans, who paraded, each led by a little girl dressed in white. It was wonderful to watch."

Mrs. McCluer is the wife of Halbert N. McCluer, attorney of Kansas City. She had one son in the service who served in Chateau Thierry, Belleau Wood and the Argonne.—Telegram.
