HEAT RECORDS ARE SHATTERED IN STATES EAST

Chicago, July 15.—Heat records continue to be broken in the middle west and the Rocky mountain areas with a Paavo Nurmi-like regularity. The weather bureau guardians having to dig back in dusty files of years ago to find any marks approaching the present wave.

The plateau states and the south west were the greatest sufferers as the summer sun lifted the mercury towards its apogee.

Salt Lake City, Pocatello, Reno, Nev., and Lander, Wyo., experienced the hottest day yesterday since records for all time in central and northern Texas.

At Wichita Falls, Texas, the official temperature was 109, while marks of 106 to 108 were common in Texas. The mark of 105.5 at Dallas shattered all heat records for the city, although a light shower there and at other points in the state brought some relief.

Lander, which is looked to in winter time to supply the "coldest" weather point record, qualified among the hottest with an even 100, while Pocatello registered 104 and Salt Lake City 102.4. Street level thermometers at the latter point showed 103, Phoenix, Ariz., touched 106, but this high figure was a drop of six degrees from Sunday, the hottest day of the summer there.

No immediate general relief was promised.
