## Live Communities are Not Accidents

When you find high class public schools located accessible to your children; when you find a community of fine churches; when you find all the conveniences of modern life at your elbow, just stop and think that this is the result of successful home trade, which has made it possible to create a splendid center of civilization in your locality. If everybody had decided to trade away from home these things could not exist in your neighborhood. They might exist in some remote city where your welfare is never considered, and you might as well be in the wilds of Africa, for all those who had profited by the money you sent them would care.

A safe and sound bank, a live mercantile establishment, or an industry that is commanding business in the community is a great asset to every person in that community. It is the thing that decides the stability of the town, and determines the growth of the place and its desirability as a place in which to live. No person cares to locate in a town where business is uncertain and shaky, or where conditions are so uncertain that investments in real estate would be a doubtful venture. And all of these conditions depend in the final analysis on what you are doing with your money and whether the town is receiving the business to which it is entitled.

The welfare of the people of a community is inseparable. Selfishness and shortsightedness exist but its the liberal broadminded spirit of live and let live that makes your home community an abiding place worth while.
