COUNCIL KILLS ADVERSE REPORT ON ZONING PLAN

Notwithstanding an adverse report from the ordinance committee, which is Alderman Rosebraugh, Simeral and Purvine, the city council last night voted to allow the zoning ordinance bill to go to third reading.

As soon as the adverse committee report was read, recommending that the ordinance be tabled until the state supreme court passes on the constitutionality of the Portland ordinance, Alderman Dancy arose and opposed tabling the bill. He said he was in favor of going as far as possible with the zoning system before the supreme court is heard from on the issue.

Asked to give the reason for this committee's report, Rosebraugh said several objections had been found in the measure, one was that if anyone wanted to plat a piece of ground within six miles of the city it would be necessary to get the approval of the zoning commission.

The new ordinance complies with the requirements of the state law and provides for the appointment of a city zoning commission.

COMPROMISE LIKELY IN CONTROVERSY OVER POWER DITCH

A resolution that was said to have been prepared by Alderman Patton was introduced last night providing for transfer of the ditch to the city. Patton, who is opposed to this, denied authorship to the resolution. Patton explained that he desired to help the new indus-

Your Hope

of daintiness... under trying conditions

Just this NEW way that solves woman's oldest hygienic problem so delightfully

To be dainty every minute of every day!... every woman wishes it. And—at times, doubts it.

Now the old-time sanitary pad has been supplanted. There is a new way that is safe and scientific.

It ends the annoyances of old ways. You live now every day of your life, unhandicapped.

It is called KOTEX, a new kind of material, a new form.

It absorbs 16 times its own weight in moisture—5 times that of the ordinary cotton pad! It is as easily disposed of as

a piece of tissue—ending the old embarrassment of disposal. It is deodorized. And that prevents danger of offense.

It's at every drug store, every department store. You ask for it without hesitation under its trade name of "Kotex."

8 in 10 women of the better classes have adopted it. Doctors urge it. Hygienic authorities employ it.

For your health's sake, for peace of mind, try it. It will make a great difference in your life.

KOTEX
 DEODORIZED

1 Protection: 5 times as absorbent as cotton pads. Absorbs 16 times its own weight in moisture—and scientifically deodorized.

2 Easy to buy, anywhere. You ask for them by name. Many stores keep them ready-wrapped—help yourself, pay the clerk, that is all.

3 No laundry. Discard as easily as a piece of tissue.

Don't Be Misled

No ordinary "olive and palm" soap does what Palmolive does

OLIVE and palm oils have been for ages the world's supreme cosmetics. Cleopatra used them. Roman beauties used them. Then in castile soap—real castile—they reached enormous fame. But men never knew how to make those oils supremely effective until Palmolive Soap came out.

Consider the result. Palmolive has shown millions the way to better complexions. Fresh, clear skins are so common now that anything else is conspicuous. Palmolive has become, by proved results, the leading toilet soap of the world.

It is made in five countries, to supply the world-wide demand. It is made in France—the home of fine cosmetics—because French women prize it so.

Yet the price is 10 cents—as low as common soaps—with artificial color—often over-fatted—which claim "olive and palm oil" ingredients. Some people are misled into classing such soaps with Palmolive.

Palmolive Soap is a unique creation, based on 60 years of soap study. It brings you olive and palm oil effects in ways never known before. Were that not so, it would never have reached the pinnacle place of today.

There are soaps that fairly compare with it—two that we know. But they cost you 25 cents. Cheap "olive and palm" soaps will sadly disappoint, if you seek for Palmolive results.

Note the *unnatural* "too green" color of Palmolive imitators. What does that suggest? Men don't paint nature to improve it.

Olive and palm oils—nothing else—give Palmolive its delicate, *natural* color. Olive and palm oils—*no other fats whatsoever*—are used in Palmolive.

No "super-fating," no "super-anything"—the only secret to Palmolive is its blending. And that is judged one of the world's priceless beauty secrets.

If you seek a mere cleanser, ordinary soap will clean. But the Palmolive appeal is to women who seek beauty and skin health. Don't think that such results can come from ordinary "olive and palm" soap.

Probably nothing in all history has done so much for beauty as Palmolive Soap. Nothing else is doing so much today.

Wash, launder, cleanse with any soap you wish. But when beauty is at stake—*take care*. Use Palmolive, nature's formula to "Keep That Schoolgirl Complexion."

IN PARIS
 French women are discarding French soaps for Palmolive

Palmolive is today one of the two greatest selling toilet soaps in France. Parisian beauties are happy to pay almost twice as much for a cake of Palmolive as American women pay. And, in many cases, three times as much as for their own French soaps. Remember this when tempted by costly French soaps, or by "French" claims for soaps.

Note carefully the name and wrapper. Palmolive is never sold unwrapped.
