FACTORY GIRL ONE OF THE 98

Will Answer Letters from Women asking about Lydia E. Pinkham's Vegetable Compound

Lititz, Pa.—"I was very nervous and suffered for a long time with pains in my back and side. I was employed in a factory and for about three months I did not work at all. There were two women who told me about Lydia E. Pinkham's Vegetable Compound. I didn't believe what they told me at first, but at last I tried it. It has taken my pains away and my nervousness. I am glad to say that I am one of the '98 out of 100' that it has helped. I recommend it when I can, as I know it is good for women's troubles. I will answer any letter that any woman writes to me. I know the Vegetable Compound has helped me and hope it will help others." — Mrs. CHARLES R. SHUE, R. F. D. 2, Lititz, Pa.

The Laundry of Pure Materials

Listen to This Medical Advice

Now the well-known journal of the medical profession, "THE MEDICO," proclaims scientific facts about preventing infection from your clothes.

We quote here from an editorial in "THE MEDICO" entitled "Washing Diseases Away." Every word bears the stamp of scientific medical authority:

"There is no commercial agency actually preventing disease like the present-day laundry.

"Our present-day laundry begins its health crusade at the start. It does not pollute water supplies. The laundry scientifically removes all dirt and painlessly causes bugs to expire.

Now Clothes Get Nine Baths

"Laundries don't start the white things through a few gallons of warm water and then successively run every other bit of soiled clothing through the same solution. No home laundry invention has ever evolved which solved the problem of producing lots of hot water for the tired housewife without making extra work.

"The laborer's underwear and Aunt Lucy's brassier both come home from the laundry clean and sweet. They are not only clean, white and sweet, but THEY ARE PRACTICALLY AS STERILE AS THE SURGEON'S GOWN.

Getting the Germs

"When people remark that laundries do not 'clean,' they speak unthinkingly. Laundries clean and in addition they kill millions of organisms that resist the tepid water of tub washing and flabby basement suds.

THE STEAM LAUNDRY.

"No Highbrow Idea"

"It is no highbrow idea to have a laundry wash your towels and your intimate things. They go smack dab against your skin and they should be as near sterile as they are free of dirt."

This Week Why Not You?

Salem women by the hundreds have ended wash-day drudgery. They have learned that laundry methods have changed—that invention has given us new machines which cause no friction—no rubbing—no chance for wear and tear. They've learned that our chemists, after years of constant effort, have produced for us entire new formulas, easier on clothes than home methods. They have learned that all delicate pieces are hand-washed by expert specialists.

And so they have turned from woman's hardest drudgery to the more scientific less-expensive laundry service. They find it costs less than an electric machine in the home. This vastly improved new laundry service is winning us new customers every week.

Why not join these other Salem women in freedom from back-breaking labor? Just Phone 165. Go and do it now.
