To Parley Debt

AMBASSADOR DACHINGER HAS ARRANGED FOR DEBT FUNDING.

With the assertion that the English hop crop this year is superb in quality, Nokes & Hanister, English dealers in a hop circular just issued, urge upon English brewers to devote all of their buyings to the English crop and refrain from the purchase of a single foreign bale.

The circular, which deals with English conditions quite in particular, has the following to say: "The careful cultivation of the English hop acreage has not abated one jot this year. Indeed, as the results will prove, it must even have been increased for the difficulties have been more than usually large, and the production of the present beautiful crop of hops, succeeding the exhaustive yield of last year (and following such an abnormally wet season) would have hitherto been regarded as impossible. Growers have secured a wonderful result and we hope that the very best of appreciation of the crop which they have produced. We believe that the quality of the hops will prove to be superb. The development of the crop is exceptional; and as there is an entire absence of heavy dew, we are confident that the crop will prove to be a vintage one. This being the case, and the supply being plentiful, we venture to hope that brewers will buy up the English crop and refrain from purchasing a single bale of foreign hops more than they, rightly or wrongly, think indispensable."

The consumption of beer for the year ending March 31st, 1925, in the United Kingdom and the Irish Free State equaled 23,372,441 standard barrels. Unfortunately the taxation on beer remains at too high a level, or we should soon see a large increase in the consumption of our national beverage, accompanied by a much to be desired decrease in the discontent and irritation which exists among the workers of our country.

The English hop acreage, according to the returns just published by the ministry of agriculture, now stands at 26,220 acres as compared with 25,900 acres last year and 24,850 acres in 1923. It should not be forgotten that, both in 1923 and 1924, the existing acreage produced more hops than were required by the brewers, after they had taken delivery of the foreign hops which they were allowed to import. The larger acreage this year has probably produced a more than sufficient crop, considering all circumstances, and this should be a warning to those who may have contemplated increasing their acreage. The present time is most inopportune, although we hope that the very exceptional quality of this year's growth will ensure a good market, especially as an exceptional demand is anticipated for export purposes.

We are glad that such an earnest attempt is being made to organize the cooperative marketing of the English hop crop by the formation of the society called the "English Hop Growers' Limited." The principle of this movement has our undivided and whole-hearted sympathy and support. We are confident that it is one which deserves the support of all growers, and also of all brewers; because we understand it aims only at the stabilizing of a fair and reasonable price for the growers of an average crop, both as regards quality and weight per acre. It desires to secure for all growers a steady and certain supply, year by year, of both the varieties, and the quality, of hops which they require, at steady and fair prices, thus avoiding extreme fluctuations which have been such a bane in the past; and which inevitably react to the great detriment both of growers and brewers. Any idea of ever forcing up prices beyond the level of securing a fair living profit has been ruled out. The tradition is to be effected through the usual trade channels, therefore the goodwill, and the co-operation of both traders and brewers is being invited, and we feel sure that their confidence and assistance will prove to be thoroughly deserved. If the motto "All for each and each for all" is ever made a reality, the result should be a happy one for all concerned.

FILBERT PLANTINGS INCREASE GREATLY
Harry Pearce, who recently returned from the Western Washington fair at Bellingham, states that people in that valley are as interested in filbert growing as they were here five or six years ago. However, he says, there will be a quite a number of small plantings made there this year as a result of his visit.

The rapidly developing filbert acreage here is now coming into bearing, Pearce referred to the case of John Smith near Astoria, who with 20 acres, which will be doubled next year. Off from his present planting he will take two and a half plantings in the tree this year, three-year old trees and four pounds to the tree from four year old trees. Pearce states this is phenomenal. He states in addition the trees are planted 90 to 100 feet apart.

GRAVES CANNERY UNABLE TO FILL ALL FRUIT ORDERS

With all its activity from early in the spring, the Graves cannery of Woodburn will fall short of filling all fruit orders on account of being unable to get all the fruit the market demands, says the Woodburn Independent. In addition to other brokerage customers the cannery is supplying a large chain of stores.

At present the cannery is packing 600 boxes of apples daily, the same amount of pears, 75 boxes of tomatoes a day, and finishing up with blackberries. The starting of schools caused a cutting down of the force, which now consists of about 100 women and 10 men.

The cannery has been able to place in circulation a large amount of money among growers for several months, and is proving a big asset to the town and the expectation is that it will be a stronger bidder next year than at any time in the past.

It is necessary for the cannery to keep shipping constantly in order to make room in the warehouse for more canned goods being turned out.

FLAX INDUSTRY DEMONSTRATED

Oregon's flax industry is exemplified at the state fair in the exhibit made by the Oregon state penitentiary, under the direction of Robert Crawford, superintendent of the prison flax plant. In one corner there is displayed everything that goes to make up a completed article of linen from the seed on through the natural flax as grown, flax de-seeded and retted straw. There is scutched flax, hackled flax, natural linen yarn and boiled and bleached yarn, as well as the finished product, a tablecloth and napkins.

Yarns and twines, manufactured by the new Miles Linen company, is attracting much attention. This includes the first ball of salmon twine produced here. Several bales, ready for shipment are in the booth. These contain upholstery tow to be used in overstuffed furniture; scutched flax, and retted hemp straw.

The background for the exhibit is arranged of specimens of flax grown in the different counties in the Willamette valley, tributary to Salem. Those who have seen the exhibit, who are in a position to speak authoritatively, state that the quality throughout is of unusual excellence. It is claimed by some enthusiasts that the flax-growing and linen industry developed in Oregon would give permanent employment to over 100,000 persons and bring in fifty to one hundred million dollars annually.

MOTORCYCLE EVENTS AT FAIR SATURDAY

Motorcycle events, arranged for by local fans, headed by Harry Scott, will be pulled off on the fairgrounds track Saturday afternoon, beginning at 4:30 o'clock immediately following the last horse race. The motor cycle parade will intervene between the first and second event, the first to cover five miles, and the second to be for ten miles.

Among the leading riders will be Cody Evans of Salem, well known to motorcyclists throughout the state; Elmer Smith of Eugene; Paul Remaley, an Australian rider in this country, and Ray Tauscher of Portland.

UNIVERSAL

Ranges and Heaters

Mr. Charles Kaddery from Cribben & Sexton, makers of the nationally known Universal Ranges, will be at our State Fair exhibit, on the balcony of the new pavilion, every day this week to point out the advantages of cooking with a Universal and heating with a Universal.

The Grey Beauty

Never was there a range as popular as the Grey Beauty. The Battle Ship Grey color harmonizes with all other kitchen equipment and adds a rich up-to-date atmosphere to the housewives busy work room.

Made of UNIVIT Porcelain, the Grey Beauty will look practically the same after long years of use as on the day it is put into use, as the Porcelain can never lose its beautiful lustre, cannot wear out, and will not discolor, crack, chip, nor peel from heat. UNIVIT Porcelain is the most durable and most perfect Porcelain made. It will stand more hard use than any range is ordinarily subjected to in a home.

UNIVIT Porcelain is ideal for Kitchen Ranges because it is Washable, Sanitary, and is practically everlasting. See it on display at State Fair and in our store.
