## Special Exhibit

You are Invited

# to take a picture trip through an automobile plant

Learn how quality is attained with modern production methods! This week we are making a special photographic exhibit illustrating the precision methods by which quality is achieved in the manufacture of the modern motor car.

Showing the Reason for Quality at Low Cost

The exhibit consists of 40 remarkable photographs of the most interesting processes in modern automobile manufacture. It will provide the same interesting knowledge that you would get by taking a trip through the plants where Chevrolet cars are built. Each picture is accompanied by a full description of the operation it illustrates. It is an exhibit of unusual interest and value. Bring the children.

## EXCEPTIONAL RIDING COMFORT

The riding comfort of a motor car is not dependent upon its length, weight or cost, any more than the comfort of a home depends upon its size.

If the seats are deep enough and the proper distance from the floor; if the seat backs are correctly pitched for relaxation; if the upholstery is sufficiently stuffed and there is plenty of leg room; above all, if the springs are rightly designed and of proper length, you will have exceptional riding comfort. Otherwise, you will not.

Dodge Brothers, with characteristic thoroughness, studied and experimented with these details for years. Their findings were ultimately incorporated in the design of Dodge Brothers Motor Car—without question now a vehicle that ranks with the first in this vitally important feature.
