"At \$895 the Overland Six is head and shoulders above its price class"

... you buyers of six cylinder cars, think this over... it will save you money in the long run, and add a lot to the pleasure and comfort you can get out of motoring... never, in the history of the automobile, have such superlative values been offered as are being offered to-day by Willys-Overland.

Overland Six Standard Sedan, \$895 f. o. b. Toledo

Amazing riding ease
... the low swung body is hung on extra long semi-elliptic springs made of Chrome-vanadium steel, the best spring steel made—the way this Overland Six rides over rough roads is a revelation to anyone.

Real beauty in this quality car
... 13 1/2 feet from tip to tip, these are the dimensions of this REAL full-size Sedan... it's built for five real full grown people to ride in with comfort... lots of leg room, unusually deep seats beautifully upholstered in velour and designed for real riding ease. There is beauty in the room of this car... and there is a beauty in the body lines that will make you want it the minute you see it. It is long and low—racy and speedy looking... with such big window space that it gives you the vision of an open car. The doors are exceptionally wide and hung on hinges that keep it in place—rattle free and trouble proof.

We invite careful comparison
... go easy when you are buying a light six—see them all—try them all out—it's by direct comparison that we can best convince you of Overland superiority. But by all means try this Overland on a steep hill—on a rough street—in congested traffic—these are the places where real construction shows up—and when you ride in it just picture three or four hundred miles that you may want to travel some day—if Overland performance—Overland room—and Overland flexibility doesn't show you more than you ever expected to see—then our experiences have all been wrong.

Easy terms—low down payment—eighteen months for the balance and your present car as part of first down payment.
