WATER SUPPLY FOR DALLAS MORE THAN DOUBLED

Dallas, Oct. 22.—The Dallas Water company has completed intake extensions that increase the available supply of water for the city of Dallas by 500,000 gallons daily, according to W. L. Soehren, manager. The improvement has been underway since June when a crew was taken to the upper La Creole.

The new supply makes available 1,000,000 gallons every 24 hours. The present consumption of the city requires about 400,000 gallons, according to Mr. Soehren's figures.

The increase of the supply necessarily raised the relaying of two miles of 10-inch pipe and the laying of 3 1/2 miles of 7-inch pipe from Applegate creek to the new diversion dam on the main La Creole river. While the stream is now at a low level the new line does not take over one-sixth of the available supply of water.

The turning-in of the new supply has raised the reservoir until the overflow will no longer create for the surplus and some water is going over the edge of the reservoir. It is probable that additional capacity will be secured by raising the wall.

The water company has been greatly aided by the fall weather in completing its extensions. Only a few days were lost during the summer because of rain and it is difficult to experience in transporting materials over the rough mountain roads.

The Best Cough Syrup Is Home-made

Here's an easy way to save 22, and get the best cough medicine you ever tried.

You've probably heard of this well-known plan of making cough syrup at home. But have you ever used it? Thousands of families the world over, feel that they could hardly keep house without it. It's simple and cheap, but the way it takes hold of a cough will soon earn it a permanent place in your home.

Into a pint bottle pour 2 1/2 ounces of Pinex; then add plain granulated sugar syrup to fill up the pint. Or, if dead, use refined molasses, honey, or corn syrup, instead of sugar syrup. Either way, it tastes good, never spoils, and gives you a full pint of better cough remedy than you could buy ready-made for three times its cost.

It is really wonderful how quickly this home-made remedy conquers a cough—usually in 24 hours or less. It seems to penetrate through every air passage, loosens a dry, hoarse or tight cough, lifts the phlegm, heats the membranes, and gives almost immediate relief. Splendid for throat tickle, hoarseness, croup, bronchitis and bronchial asthma.

To avoid disappointment, ask your druggist for "2 1/2 ounces of Pinex" with directions, and don't accept anything else. Guaranteed to give absolute satisfaction or money refunded. The Pinex Co., Ft. Wayne, Ind.

Inhale the Vapors For Catarrh and Colds

To relieve catarrh or check a head cold, melt a little Vicks in a spoon and inhale the vapors of Camphor, Menthol, Eucalyptus, Thyme and Turpentine. Also put a little in each nostril and snuff well back up the head.

Another way is to heat a tin cup, put in a teaspoonful of Vicks and inhale the vapors that way. As fast as the vapors lose their strength, throw out the melted Vicks and add fresh.

Millions of mothers find Vicks the ideal remedy for croup and children's colds because it not only brings quick relief but avoids dosing delicate little stomachs with so much medicine.
