Mansfield Dancers Coming

Widepread interest followed the announcement by the Civic Music club early in the fall that the Portia Mansfield dancers will appear under their auspices for the second time. Last year the dance concert given at the Grand theater, now the Hellig, by the dancers was one of the most successful of the entire year.

The second Salem concert of the dancers will be given at the Hellig theater a week from tonight, November 16.

Each year this unique organization spends the summer at the Perry-Mansfield camp in the Rocky mountains, where their time is given to dancing, riding and athletic sports of all kinds and they revel in the dances that permit them to exhibit their athletic daring and skill, such as the "Saturnalia," the "Picnic Day in Holland" and the "Etruscan Screen" dance.

Among the company are such well known dancers as Jeanne Fuller and her partner, Harold Ames, Virginia Mansfield, Alice Mickey and Erma Chase.

A Simple Way to lighten cloudy teeth

This remarkable new way, urged by dental authorities, also firms the Gums... removes the grimy film that clouds and hides the natural beauty of your teeth.

THAT dull, "off-color" teeth can be lightened amazingly, even given dazzling whiteness, now is an accepted dental fact. You can work a transformation in your mouth.

Leading dentists now tell us how to clear grimy teeth, and, at the same time, give firmness and healthy color to delicate gums. A new method that supplants old-type dentifrices. It removes the grimy film that covers teeth and hides their natural beauty.

Just run your tongue across your teeth. And you will feel that film. It is the great enemy of pretty teeth and healthy gums.

It clings to the teeth, gets into crevices and stays. It forms a breeding place for germs. It lays your gums open to bacterial attack, your teeth open to decay. Those germs, with tartar, are the chief cause of pyorrhea.

Old-time methods failed in successfully fighting film. So ugly teeth were common. You must remove it. Ordinary brushing won't do it satisfactorily. Under it are the clear, whiter teeth you envy in others.

Now modern science has perfected an effective film combatant, called Pepsodent. It acts to curdle film, then removes it—no harsh grit dangerous to enamel. It firms and protects gums; beautifies teeth quickly and correctly.
