

COOKING SCHOOL AT SALEM ARMORY

PRIZES DISPLAYED AT H. L. STIFF FURNITURE STORE

The prizes for the Capital Journal cooking school are on display in the window of the H. L. Stiff furniture store on Court street. It will be well for the ladies to look them over for they are prizes of real merit. The electric range, the electric grill, the vacuum cleaner and lots of other things are all there—after Wednesday they will be scattered to the four corners of Salem. Stop at Stiff's and see the prizes and then get busy and arrange to take one of them home on Wednesday evening.

Tickle Babes Is Advice of Specialist

London, Nov. 20.—(A.P.)—If you would have strong healthy children, tickle them when they are babies and make them laugh. This is the advice of Sir Harry H. Bruce Porter, a specialist in children's diseases, and who is consulting physician to the American Red Cross in London. The advice given before the members of the national society of day nurseries. The eminent physician claims that most of the cherished traditions of the nursery not only fallacious, but prejudicial to youngsters.

"It is a good thing to tickle babies," said Sir Harry. "It makes them laugh and thus they expand their lungs and breathe fresh air." Continuing his dissertation, Sir

Harry contended that it was wrong in families where there are children to cease all noise when the babies are asleep. It was much better, he believed, that the child should be prepared for the rough and tumble of later life through being allowed to sleep with noise going on everywhere.

Mrs. Job E. Hedges, widow of the noted humorist and lawyer, has enrolled for her second year as a student in Columbia University Extension. She plans to continue her university work as long as she lives.

Now

have all the clothes that touch his tender skin washed this new and safer way

Now a NEW method of washing baby's things learned by modern science. Every mother ought to know this SAFER way.

Are Your Clothes Sterilized?

Home washing methods, science has learned, seldom sterilize clothes without harm. Today modern science has given us new methods which shorten completely without injury or damage to fabric.

So the modern housewife is turning today to a new and modern method.

What Science Found Most Important

Strangely enough, modern science has learned that the most vital part of washing is the rinsing.

Old ways, used by housewives from time immemorial, involve only one or two rinsings. Scientific laboratory tests showed this not enough to remove every particle of soap and every foreign substance and therefore harmful to baby's tender skin.

An Added Danger

An added danger lurks in the soap you use. Free alkali in soap is detrimental to the life of fabric. Left in the garment through insufficient rinsing, it is dangerous for baby's skin.

Most home laundry soaps and powders contain it. A leading, highly advertised cheap soap for home laundering purposes has been found by our chemists only 75 per cent pure. It contains considerable free alkali. Yet it is one of the best which housewives use.

Only one soap advertises the per cent of its purity. Housewives must buy laundry soaps blindly, not knowing what they are getting.

Just note

how little it costs to send your washings to this laundry—

1. WET-WASH—Saves far more work than electric washer, actually at less cost. Everything scientifically washed with purest of materials and returned slightly damp, just right for ironing. 20 pounds or less, 75c, 4 cents each additional pound.
2. THRIFT SERVICE—Same as Wet-Wash except all flat pieces ironed, 15 pounds or less, 80 cents, 6 cents each additional pound.

And Three Other Low Cost Services

This Way Baby's Clothes Are Safe

At the Capital City Laundry, baby's clothes—and ALL your nice things—are safe. All silks, all delicate, dainty pieces are sorted out of your bundle and carefully handwashed by specialists trained in scientific methods.

We hold the advantage of scientific laboratory tests for purity of materials. Not a particle of free alkali exists in the soap we use. You may safely wash your face, or shampoo your hair, in any water or solution in which we place your clothes! This is the laundry of PURE MATERIALS.

After three careful suds baths in PURE soap—a fresh change of clean water and suds for each bath—we give your clothes SIX thorough rinses in SIX changes of fresh clean water.

And at the Capital City Laundry, your clothes are completely sterilized, by the new HARMLESS way discovered by science.

Try This New Way Two Weeks

So, under the NEW scientific washing methods we now use, baby's clothes—and all your daintier, finer things—come home from this laundry sweet and clean, fluffy and soft, as sterile as a surgeon's gown—SAFE for baby's tender skin.

Why not try this new and SAFER way—just two happy weeks? Join the hundreds of other Salem housewives and mothers in this new freedom. Note how much more cheerful you are on Monday evenings. Note how lovely your clothes come home. Note how much LESS than you expected is the cost.

Let this two weeks' trial decide you. Send everything—baby clothes, silks, linens—everything. We guarantee their safety. Just call 165, and tell us when to call for the first trial bundle.
