## Many Home From Beach Resorts

Informal entertainment for house guests from all parts of the states, comings and goings from mountain and beach resorts, a few weddings, an occasional luncheon and bridge tea, are the only affairs, with one exception, which kept society pages of the week's papers from being complete blanks. The exception, and an affair which proved to be one of the most delightful of the entire season, was the tea given in the Homer H. Smith home and garden on Thursday, Mrs. Smith, Mrs. F. W. Poorman and Mrs. Ludlow H. LeFurgy were the hostesses.

Within the last few days the annual homeward trek of summer vacationists from beaches and mountains has begun in earnest and the next fortnight should see the return of all but a scattered few. Club leaders are planning vigorous programs. Musical organizations are outlining their concert programs for the winter. The dramatic league has announced the return of the Moront Olson players and the scheduling of three world famous lecturers during the coming season. All of which leads one to believe that the coming year will be one of the busiest and most interesting of the decade. ## YANKEE PLANES TO FLY AROUND SOUTH AMERICA

Washington, Aug. 21.—(AP)—A flight by five army airplanes around South America is being planned by the state and war departments.

Formal announcement that the air project was actually in process of arrangement between the state department and the various South and Central American governments concerned was made today in a joint statement issued by the two departments.

"The war department contemplates a flight around South America by five army airplanes," the announcement said. "The state department has requested the various countries on the route of the proposed flight, for permission to fly over their territories.

"Favorable replies have been received from some of them.

"Until replies shall have been received from all of the countries concerned, the war and state departments deem it courteous not to discuss the route or detailed plans for the flight."

The starting point of the flight presumably will be at Kelly Field, San Antonio, Texas, army air corps training center.

Seattle—Secretary of Labor Jan. J. Davis said that so-called pauper labor must be kept out of the country, that low wages are a thing of the past.

San Diego, Calif.—One of the "hard luck" scaplines of the navy, the E-3, is to make another attempt to fly from Seattle to San Diego.

## BAT SCIENTIST LEARNS USE OF SPLEEN TOXIN

San Antonio—Discovery of the purpose of the spleen, a puzzle to most scientists and physiologists has been made by Dr. Charles A. R. Campbell, scientist and clever specialist of San Antonio.

The spleen, Dr. Campbell told the county medical society, is to neutralize the toxins thrown off by the malarial parasite, thereby perpetuating the disease by preventing the host (the body into which the parasite enters), man and the parasite from being overwhelmed by the toxins.

His discovery, the doctor said, places malaria in a new and different light, and shows it to be a natural part of nature for the human being.

## METHODISTS OF QUAKER CITY IN ROW OVER FIGHT

Washington, Aug. 21.—(AP)—Tex Richard's current arrangement to put on the Dempsey-Tunney championship bout in the huge Sequi-Centennial stadium at Philadelphia was described today by the Methodist Board of Temperance, Prohibition and Public Morals as a "threatened disgrace" to the city.

A report that the Sequi-Centennial exposition at Philadelphia has been sold to Mr. Tex Rickard for one day and that the exposition is to participate in the profits of a prize fight is distressing to Christian people, said the board.

"This affair will be a debasing influence in Philadelphia and will extend its evil suggestions throughout the country. So long as we tolerate prize fighting, we have no right to criticize the Spanish for tolerating bull fighting, for the one is as brutal as the other."

Oakland, Cal.—Guests at a wedding rushed from the house last night when a fire broke out just as the bride and groom were about to say "I do." The ceremony was completed after the blaze had been extinguished.

## FIRST SCHOOLS TO OPEN SEPT. 7

The first of the county schools will open this year on September 7, much of the disgust of numerous small boys and girls who live in the remote rural districts where the early opening is to take place. These schools lie in sections where there are no prunes and hops to demand assistance of boys and girls in the picking season. The next batch of schools to open will start on September 13, while the greater number, including Salem, will open on September 23.

Because of the advanced season in agricultural and horticultural products, schools are opening considerably earlier than usual, Mrs. Fulkerson states.

The county superintendent's office is in receipt of the library books bought for various county school libraries and distribution of these will start at once so they will be in the libraries in readiness for the opening of the schools.

Read of Other Women Who Found Health

Brooklyn, New York—Mrs. G. Hegmann of 25 Central Ave., was in a run-down condition and could not do her housework. She could not sleep at night. Her story is not an unusual one. Thousands of women find themselves in a similar condition at some time in their lives. "I found your advertisement in my letter box," wrote Mrs. Hegmann, "and took Lydia E. Pinkham's Vegetable Compound and got relief." Mrs. Hegmann also took Lydia E. Pinkham's Herb Medicines and Lydia E. Pinkham's Pills for Constipation, with good results. She says, "I am recommending your medicines to all I know who have symptoms the same as mine, and to others whom I think it will help. You may use my statement as a testimonial, and I will answer any letters sent to me by women who would like information regarding your medicines."

There are women in your state—perhaps in your town—who have written letters similar to this one telling how much Lydia E. Pinkham's Vegetable Compound has helped them.

## NEW RAIL LINE ALASKAN FIELD

Tanana, Alaska.—An extension of the Alaska railroad from Fairbanks to the Yukon river and thence north along the Chandalar river, a survey of which is proposed by a bill in Congress, would tap an undeveloped area north of Brooks range 69 miles long and 100 miles wide.

Placer mining camps have pushed beyond the Arctic circle into the foothills south of Brooks range. Stories are told here of prospectors who reached the top of the range but dependent on rifle and fishhook for food, did not go on to work streams flowing north to the Arctic ocean.

Streams whose heads are known to cut into a lime formation capping the Brooks range bear nuggets of gold, silver and copper in raw state, indicating mineral deposits in the divide region. A bed of black gold has been reported in the extreme north on the Arctic slope near the government oil reserves.

The Alaska railroad, built by the government, runs from Seward on the Pacific coast to Fairbanks, 125 miles east of here and the same distance south of the Arctic circle.

Seattle, Wash.—Wallace Cloyes Gaines, convicted of murder with hanging as the penalty, expressed confidence that he would be given a new trial and that he would prove his innocence.

Tacoma, Wash.—The famous trans-polar airship Norge arrived from Alaska, dismantled and crated enroute to Italy.
