Geologist Addresses A. A. U. W.

A fascinating explanation of the geology of Oregon with a description of the significance of the present day conditions was given by Professor Florian Von Eschen teacher of geology at Willamette university, before a luncheon meeting of the Salem branch of the American Association of University women at the Gray Belle on Saturday.

Thirty members of the association and a number of additional guests were included in the group. Mrs. Roy Klein, president, announced during the brief business session that those members who are interested in the formation of an afternoon literature section, patterned after the literature section which meets in the evening should call her at 2222 W. as soon as possible and she will arrange for a section to meet in the afternoon.

Following the branch meeting on Saturday the International relations sections held a brief session with a discussion of the Institute of Pacific Relations held in Honolulu last summer. The discussion will be continued at the next meeting of the section following the December meeting of the branch. Information regarding this section may be obtained from Mrs. F. G. Franklin or Mrs. Luther Chapin.

In December the child study section of which Mrs. C. A. Downs is chairman, will be in charge of the program.

"There has been tremendous impetus in the development of grand opera in America in the past few years," is the opinion of Edward Johnson, brilliant tenor of the Metropolitan Opera company, who appears here at the Elsinore theatre on Friday evening, November 25, under the auspices of the Salem Artist Series.

"Until the last few years," continues Mr. Johnson, "the Metropolitan Opera company was the only one in the country, and until a short time ago there were only this company and the Chicago Opera company. Now there is the San Carlo Opera company, which tours America from coast to coast every year, and several organizations visit the larger cities of the United States, making use of local choruses. This means that people are interested, and after all, desire is the seed of any great enterprise. This means that American people want grand opera, and it will only be a few years before we will have a real American grand opera." Mr. Johnson uttered this last sentence almost fervently and with the utmost enthusiasm.

Mr. Johnson believes that there is no reason why the great operas should not be sung in English. He thinks that when America can get real literary men to do the adaptations, to bring out the poetry and spirit of the text, it will have translations that will be things of beauty.

"Why shouldn't Falstaff and Othello be sung in English instead of Italian," concludes Mr. Johnson. "After all they are Shakespeare, and Shakespeare was English. It is just a matter of setting and getting used to it, and some day we will have it."

Willamette Shrine No. 2, Order of the White Shrine of Jerusalem, will hold a stated communication in the Masonic Temple beginning at 8 o'clock tonight.

BEWARE THE COUGH OR COLD THAT HANGS ON

Persistent coughs and colds lead to serious trouble. You can stop them now with Creomulsion, an emulsified creosote that is pleasant to take. Creomulsion is a new medical discovery with two-fold action; it soothes and heals the inflamed membranes and inhibits germ growth.

Of all known drugs, creosote is recognized by high medical authorities as one of the greatest healing agencies for persistent coughs and colds and other forms of throat troubles. Creomulsion contains, in addition to creosote, other healing elements which soothe and heal the inflamed membranes and stop the irritation and inflammation, while the creosote goes on to the stomach, is absorbed into the blood, attacks the seat of the trouble and checks the growth of the germs.

Creomulsion is guaranteed satisfactory in the treatment of persistent coughs and colds, bronchial asthma, bronchitis and other forms of respiratory diseases, and is excellent for building up the system after colds or flu. Money refunded if any cough or cold is not relieved after taking according to directions. For sale by all druggists.

Siviter Horn, ninth B student at Parrish junior high school has written the following regarding an art exhibit to be held at the school in a fortnight:

"On December 5 and 6, an art exhibit of the best pictures of the age will be held in the J. L. Parrish junior high gymnasium for the purpose of raising money to buy pictures for the school and help the general art appreciation of the school and community.

"The exhibit will be open from 4 to 5 o'clock in the afternoon and 7 to 10 in the evening, with a program at 8 p. m. in which there will be picture posing with musical accompaniment.

"As Salem has no large art collections it is a golden opportunity for the community to see the pictures. There are about 150 reproductions of the best paintings of the world has known. Wherever it has gone it has received the praise as one of the most collections on exhibit.

"One of the best pictures in the exhibit is Abraham Lincoln by Marshall, a picture of the Lincoln the people knew, the Lincoln with the wrinkled face of Lincoln, the martyr president."

WOMEN OF MIDDLE AGE

Praise Lydia F. Pinkham's Vegetable Compound

Mrs. Annie Kwinaki of 526 1st Avenue, Milwaukee, Wis., writes:

"Three years ago I became so weak and run-down that I was not able to do my household work. She was the name Lydia F. Pinkham's Vegetable Compound in the paper and said to her husband, 'I will try that medicine and see if it will help me.' She says she took six bottles and it feeling much better.

Mrs. Mattie Adams, who lives in Downing Street, Brewton, Ala., writes as follows: "A friend recommended Lydia F. Pinkham's Vegetable Compound and since taking it I feel like a different woman."

With her children grown up, the middle-aged woman finds time to do the things she never had time to do before—read the new books, see the new plays, enjoy her grandchildren, take an active part in church and civic affairs. Far from being pushed aside by the younger set, she finds a full, rich life of her own. That is, if her health is good.

Thousands of women past fifty, say they owe their health to Lydia F. Pinkham's Vegetable Compound.

CAMERAS FAIL TO CATCH WEE BIRD

London.—(AP)—Humming birds' wings have baffled Britain's fastest camera.

For weeks the air ministry has been endeavoring to photograph birds in action as an aid in perfecting the helicopter, but the attempts were unsuccessful.

Humming birds hover in front of flowers, sipping the nectar while stationary in the air, and this is the secret which the government officials have been trying to record on the film.

One film was taken at the rate of 300 exposures every second, but the birds' wings were entirely too fast. Only blurs showed where the scientists had hoped to see wing movements.
