OILING WORK ON MILL CITY ROAD

Mill City, Aug. 13—The work of oiling the road between Mehama and Mill City is progressing very nicely. First the road was smoothed up and then a heavy coat of very heavy oil, approximately 21,000 gallons to the mile, was spread over the surface, this being covered with a coating of fine crushed rock. Then another coating of oil was added and from all appearances this will be one of the finest pieces of road in the county and with the increasing amount of tourist travel a new bridge across the Santiam would make this one of the scenic drives of the state. The many beautiful camping places where good fishing and bathing may be enjoyed anywhere between Mehama and Detroit bring hundreds of automobile parties every Sunday to enjoy the scenery.

WARNING TO PURCHASERS OF ELECTRIC WATER HEATERS
Electric water heaters and other appliances are frequently offered for sale by traveling salesmen that take more electricity than lamp sockets and lamp cords are capable of carrying SAFELY.
It is dangerous to connect such appliances to lamp sockets or cords as they may cause a fire
They may also burn out your meter.
To avoid these dangers, consult one of the responsible local electrical firms as to the advisability of connecting such devices to your wiring before doing so.
We have found upon testing such appliances that they sometimes take almost twice as much electricity as is shown on the name plate or claimed by the salesman.
