Willamette University

The campaign to secure an additional endowment sum of \$450,000 for Willamette university has just been launched. This campaign, while not being ushered in with a blare of trumpets and a lot of noise should be of interest to many persons of the northwest and particularly so to citizens of Salem. For it is this community which will benefit most by the raising of this large amount of money for the betterment of one of Oregon's oldest educational institutions.

A history of the school shows that a meeting called by Jason Lee was held February 1, 1842 at the old mission station, ten miles north from the present location of Salem, to consider the founding of a school. This meeting decided to organize a Christian school, to be called the Oregon Institute which should become a university as soon as circumstances would permit. A board of trustees, including Jason Lee was appointed. This marks the true founding of Willamette university.

The building now known as Waller hall was occupied on October 21, 1867 although it was not fully completed. Its original cost was \$60,000 which represented a value much greater than that of today.

Miss Emily J. York was the first graduate of Willamette university. She received the degree of Mistress of English Literature in 1859. Since that time about 1500 students have been graduated from the institution and 15,000 in all have attended the school. Many of these have made their mark in the world in various enterprises.

Considering Willamette from a purely financial side and not taking into consideration the educational value of the school, it would be good business for the city of Salem to subscribe for the entire amount of \$300,000 which the trustees hope to raise. The additional \$150,000 will be given the university by the Rockefeller foundation if the larger amount is raised.

The 540 students at the school spend approximately \$270,000 in each of their four years spent at the school. In addition to this sum, the payroll of the school amounts to about \$100,000 more. Virtually all this money is spent here in Salem. An additional endowment sum of \$450,000 would bring to the city \$270,000 more annually.

A larger endowment means additional buildings on the campus, for one or two men have assured President Carl G. Doney that they intend to do something worth while along this line for the university.

Surely an industry with a \$372,000 annual payroll here, which is a going concern, and owes not a dollar deserves every consideration from the citizens of Salem.

—FRED ZIMMERMAN.

Better Health - Longer Life

GORGAS MEMORIAL INSTITUTE

HEADACHES MAY BE INSIDE OR OUTSIDE. CAUSES ARE VARIOUS AND INCLUDE "TAMPERING"

By John William Shuman, M. D., Los Angeles, California

Headaches may be inside or outside of the head. The outside headaches are really neuritis. Such pains are accompanied by tenderness and usually affect one side only.

A few of the causes for inside headaches are over-eating and drinking, hunger, high blood pressure, anemia, fever, and pneumonia. Headaches, with other symptoms, are but part of symptom complexes which speak for underlying causes such as gastro-intestinal and kidney diseases or some local or systemic affection or infection.

The brain is confined within a bony vault and anything that will cause increased intracranial pressure will give rise to headache. This is mechanics as applied to an increase of brain inflammatory exudate (meningitis) and new growths (brain tumors).

One of the near and frequent causes for headaches is sinusitis. The ache may be near frontal in type if the frontal sinuses are filled with dammed up pus, or the pain may be in back and above the eyes if the maxillary sinuses are involved.

Brain tumor and headache are so closely connected that only vomiting and choked discs are necessary to make the diagnosis more certain.

Nocturnal headache makes the consultant think of syphilis as a cause.

The headache of hypertension usually is worse on arising in the morning and subsides towards noon on account of elimination from skin, kidneys and bowels. The headache of sinusitis resembles this because drainage is best when the patient is up and clearing the nose and nasopharynx.

Eyestrain and misplaced uterus, in spite of the popular idea, seldom cause headache. The person who complains of headache is usually one who eats irrationally, takes exercise sitting down, and frolics in homeopathic doses, which results in a disordered gastrointestinal tract, flabby skeletal muscles, and a system shot changed on oxygen.

Too seldom is a thorough physical examination given these patients.

Such a complainant does get glasses set astride her nose, and surgical tack hammer procedures about the pelvis, but the headaches continue—"more severe at the periods."

She too often is "an only child" and pampered to headaches. Her mother was "a sick headache sufferer for years," and transmitted, not only the disposition but the disease by being the wrong kind of an object lesson to the offspring.

Pituitary congestion can cause headache. The discomfort is bilateral in character. It often follows the ingestion of carbohydrates in excess and may be accompanied by pathological sleepiness.

It is well nigh impossible to ascertain the cause of some headaches. An autopsy on a woman, who died following an operation and had had "headaches since a young girl," revealed the dura markedly thickened and adherent to the brain. These scars, which may well have caused the headaches, were possibly the result of an early meningitis.

CAVEMAN ACCEPTED TO SERVE ON JURY

Hamilton, Bermuda (AP)—A caveman presented himself for jury duty before the current session of the supreme court and was accepted.

The chief justice asked the juror his occupation and was startled to hear him reply that he was a caveman. There was a hush in the courtroom as the fact was brought out that the prospective juror owned a big hole in the ground to which he charged an admission fee.

SCIENTISTS' MEETING IS WORLD'S LARGEST

New York (AP)—The world's record, in point of size, for scientific gatherings is forecast for the annual meeting of the American association for the Advancement of Science here, December 27 to January 2, inclusive.

The meeting, says Dr. Henry Fairfield Osborn, president of the association, "will be the largest convention of the men and women of science and friends of scientific advancement that has ever taken place in this country, if not in the world."

"All branches of learning will be represented in the numerous programs. This will be a great event for the city of New York and adjacent regions where there are no many institutions of higher learning and intellectual culture. It will be a great event for the whole of the United States and Canada; the 5000 or more people who will attend will be drawn from the whole of the English-speaking North America."

HOT DOGS FIRST

Milwaukee (AP)—A "hot dog" stand was the first business venture on Milwaukee's newly widened Cedar street. The building inspector failed to prevent the issuance of a permit.

WINTER SEASON IN FLORIDA

Here are a trio of girls who took part in the bathing review recently at Daytona Beach, Fla. Left to right: Anne Lipstein, Helen Wood and Mary Seay.

POSTAL TRANSLATOR MAY CURB QUACKS

Washington (AP)—Manufacturers of fake nostrums and quack remedies are reaping a rich harvest among foreign-speaking people in the United States because the post-office is unable to decipher their advertising in the foreign press.

A house committee, hearing budget needs of the postoffice department, was told a translator was needed solely for the purpose of rendering into English the flowery advertisements for cure-alls and questionable products in foreign language newspapers of the country.

The department has one translator, but he is busy on communications from foreign administrations.

Manufacturers of fake nostrums and appliances advertise their products without semblance of restraint in the foreign press, and thus make themselves liable to prosecution, the committee was told.

FRENCH DEED GROUND FOR AMERICAN GRAVE

Washington (AP)—Through the gift of the French village of Moyenneville of the ground occupied by the grave of Lieut. Thomas R. Plummer of New Bedford, Mass., a controversy of 10 years comes to an end.

Unlike most American families whose sons fell in France the Plummer family strongly desired that Lieutenant Plummer's body be left in the little French cemetery where it was buried two days before the Armistice was signed and a few days before the Croix de Guerre awarded him by the French government was received.

This caused the unwinding of much red tape. Lieutenant Plummer, although 59 years of age when the war broke out, enlisted in the American Red Cross and was assigned to the French village of Moyenneville just behind the French lines. There he did such valiant work that he was beloved by the entire population of the village.

He buried his wife with highest honors in their own village cemetery. His death was the result of unselfish devotion to sick and wounded French soldiers.

IRELAND BARS WHISKY FROM HISTORIC TARA

Dublin (AP)—The Free State authorities refused to license a drinking saloon on the hill at Tara, Ireland's most historic spot.

Tara draws hundreds of tourists annually and there is no public house in the vicinity where alcoholic beverages are sold. A local citizen saw an opportunity for enterprise and applied for a license. The court refused on the ground that visitors to Tara wanted to view the scenes of olden glories and are not concerned with stout or whiskey.

GOOD DEED FATAL

Knoxville, Tenn. (AP)—Charles Bradshaw, negro, died of tetanus, which developed from a finger-cut received when he helped Jack Henry push the Henry auto out of a mud.

Now Henry is defendant in a suit for \$10,000 in Circuit Court because he was the beneficiary of Bradshaw's fatal good deed.

WHY GIRLS GO WRONG

Des Moines, Ia. (AP)—Their inability to earn sufficient money with which to buy the things they desire, and failure to set some definite goal for their efforts lead most of Iowa's delinquent girls and women to the reformatories. At least, that was the declaration of Miss Margaret Rosa, Des Moines' 19-year-old inmate, after she visited the state reformatory at Rockwell City.

Boston (AP)—Silk manufacturing is invading New England, traditionally home of the cotton manufacturing industry. Within short period plans for four new silk plants were announced.

SCIATICA THE DEMON PAIN

Tingling, prickling, pains that travel down the thigh and leg to the heel are caused by an inflammation of the sciatic nerve. Don't waste time using drugs to "mask" these pains. Get a supply of Tyamol, that soothing, healing absorbent which goes in through the pores and helps to drive out the inflammation completely. Tyamol is guaranteed harmless—free from narcotics. Excellent for all forms of nerve pain, whether caused by sciatica, neuritis, neuralgia or rheumatism. Nothing like it for muscular soreness and stiff, swollen joints. Sold by leading druggists. Always on hand at

DANIEL J. ERY'S

FUR MANUFACTURE IS GREAT INDUSTRY

Washington (AP)—Fur manufacture in this country has become a \$250,000,000 business.

A survey of the industry by the department of commerce shows that the number of establishments engaged in the manufacture of fur goods, other than felt hats, has increased from 1,200 in 1914 to 2,000 in 1925, while the number of workers has advanced from 9,000 to 17,000, and the wholesale value of their aggregate product has increased from \$44,000,000 to \$254,000,000.

Although the Mississippi Valley is rated as the largest fur-producing area in the world and supplies a large portion of the annual \$70,000,000 catch, which is double that of Russia and three times that of Canada, it is necessary to import some \$136,000,000 worth of furs and to bring in \$4,000,000 worth from Alaska to meet the demand.

Imports come from all sections of the world, only six countries supplying more than \$5,000,000 worth yearly.

An export business also has been developed, with the United Kingdom, Canada, Germany and France the best customers. Exports last year were valued at \$31,000,000.

PASTEUR CHIEF BACKS VACCINATION THEORY

Paris (AP)—The anti-tuberculosis vaccination at birth of children of tubercular mothers theory has gained a powerful supporter in Dr. Emile Roux, head of the Pasteur institute.

In a letter to the French Academy of Medicine he compares the opposition to this practice with that which Pasteur experienced.

The statistics furnished by Professor Calmette, discoverer of the vaccine, are decisive, in the opinion of Dr. Roux.

Professor Calmette shows that from 1924 to 1928, 115,000 children were vaccinated. Among the non-vaccinated, he says, the mortality amounted to 15.9 per cent. Vaccinated children escaped with a mortality of only 3.4 per cent, his figures show.

LOWER SCHOOL AGE

Eagle Rock, Cal. (AP)—A lower age limit for children entering school is becoming necessary, according to Dr. Irene T. Meyer, dean of women at Occidental college.

The child three years old is becoming set in habit, temperament, self-control, and all other elements of personality, she said. For this reason skilled guidance is needed at an earlier age.

EVIDENCE GIVEN BATH

Sioux City, Ia. (AP)—Liquor raiders visited a home here recently while son, Willie, was being given an afternoon bath. Upon learning who was at the door, the mother promptly slammed the door and told her visitors to wait until she put some clothes on the boy.

When the officers succeeded in breaking in they found that a quart of alcohol had been poured into the tub, but since it did not mix with the soapy water they were able to collect evidence.

Don't Let That Cold Turn Into "Flu"

That cold may turn into "Flu," Grippe or even worse, Pneumonia, unless you take care of it at once. Rub Musterole on the congested parts and see how quickly it brings relief as effective as the money old mustard plaster.

Musterole, made from pure oil of mustard, camphor, menthol and other simple ingredients, is a counter-irritant which stimulates circulation and helps break up the cold.

You will feel a warm tingle as it enters the pores, then a cooling sensation that brings welcome relief.

PARIS SEERESS PREDICTS YEAR OF "AGITATION"

Paris, (AP)—The year 1929 will be marked by the death of a king, by the passing of two very important French political personages and two world famous men of letters and enough airplane, mine, railroad and steamship accidents to keep the newspapers supplied with front page news.

All that was apparent in the crystal ball to Madame Fraya, the French prophet who has become famous ever since she predicted, a year ago, the tragic death of the Belgian millionaire-banker Alfred Lowenstein.

"The new year will be one of great agitation," Madame Fraya told the United Press.

"France particularly will suffer because many men are hungry for power. The present French cabinet will tumble, but many of its members will come back to power."

"There will be many scandals in society and finance, a great increase in crimes and divorces. Several terrible airplane catastrophes will shock the world but aviation generally will make great progress."

"Water will cause several disasters with great loss of life, one of them will occur in America. There will be one menace of war, in which France will be involved but I see no bloodshed."

"Living will become more and more dear, but business will be bad. There will be an unusual number of failures among small merchants. The outstanding debt will be that of a king very friendly to France."

Ever since M. Lowenstein fell to his death in the Channel from his airplane the fame of Madame Fraya has spread and the world, including many Americans has beaten a path to her door. Her bank account has been materially fattened.

Cromwell's Head

Graces Study of English Minister

Ipswich, England (AP)—Oliver Cromwell's head is still kept hidden away here in a seventeenth century oak box.

It is in the study of the chaplain to the Bishop of Ipswich. The chaplain now owns the gruesome relic of the Glorious Revolution.

At his death, Cromwell's body was embalmed and at the Restoration it was disinterred and reburied, the head being placed on a pike outside Westminster Hall.

For 16 years it remained there. Then on one dark, stormy night the shaft of the pike snapped and the head fell down. It was picked up by the sentry. As years went by it came into the possession of different people.

The features are clearly distinguishable to this day and the hair still remains upon the head.

SOVIET DIVERS FIND TORPEDOED WARSHIP

Novorossiisk, Russia (AP)—Soviet divers have discovered the hull of the largest warship of the soviet Black Sea fleet, "Free Russia," torpedoed off Novorossiisk harbor in 1918.

The ship was sunk by the reds to prevent its falling into the hands of the Germans. It rested at a depth of 125 feet and the authorities are confident of raising it.

PUBLIC LAND REVENUE

Washington (AP)—The public domain produced a government revenue of \$6,700,000 for the fiscal year 1927-28, largely out of mineral lease royalties. The administrative cost was \$2,200,000.

New Brunswick, Canada (AP)—Bay of Fundy herring fishermen are making more room for the fish in the notoriously cramped containers in which they are packed by removing the scales for sale to the pearl essence industry. A dollar a hoghead is regarded as fair profit. One boatman is reputed to have made \$280 in a week.

BOAT BRINGS TROPHY TO PACIFIC

Miss California, owned by Dick Loyne of Long Beach, Cal., made 49.09 miles an hour to win the 151 class hydroplane national championship races at San Diego, Cal. He won the Elgin trophy from the east where it had been held.

INSTITUTIONS TO TURN BACK MONEY

A total of \$168,455.66 will be turned back to the state from unexpended balances in appropriations to the various state institutions, according to reports filed with the state board of control. Of this amount the state Training School for Boys will turn back a balance of \$47,849.74 out of an appropriation of \$233,868. The Eastern Oregon hospital for the insane at Pendleton will turn back \$47,078.77 out of an original appropriation of \$446,000. Unexpended balances as reported by other state institutions are as follows: State hospital for the insane, Salem, \$14,743.56; state prison, \$5,039.37; state institution for feeble minded, \$28,241.19; tuberculosis hospital \$51,199.81 state school for blind, \$117,331; state school for deaf, \$40,855.01; industrial school for girls, \$13,529.29; employment institution for adult blind, Portland, \$11,982.11.

JAIL IS HER HOME FOR LONG PERIOD

Columbus, N. C. (AP)—Mrs. R. F. McFarland is 43 years old and has lived in jail so long she declares "I don't know how to act anywhere else." She has lived in the Polk county jail for 23 years, "off and on."

Mrs. McFarland moved into the jail first when she was a schoolgirl. At that time her father was the high sheriff, and as was the custom his family lived in the lower part of the jail.

When Mrs. McFarland was married it was to a young man who became the county's jailer. Later her husband was elected to the office of sheriff and they continued to reside in the jail.

A new sheriff having been elected recently, the McFarlands have had to retire to life in a cottage.

Dr. Caldwell's 3 Rules Keep You Healthy

Dr. Caldwell watched the results of constipation for 47 years and believed that no matter how careful people are of their health, diet and exercise, constipation will occur from time to time regardless of how much one tries to avoid it. Of next importance, then, is how to treat it when it comes. Dr. Caldwell always was in favor of getting as close to nature as possible, hence his remedy for constipation, known as Dr. Caldwell's Syrup Pepsin, is a mild vegetable compound. It can not harm the most delicate system and is not a habit forming preparation. Syrup Pepsin is pleasant-tasting, and youngsters love it. It does not gripe. Thousands of mothers have written us to that effect.

Dr. Caldwell did not approve of drastic physics and purges. He did not believe they were good for human beings to put into their systems. In a practice of 47 years he never saw any reason for their use when a medicine like Syrup Pepsin will empty the bowels just as promptly, more cleanly and gently, without gripping and harm to the system.

Keep free from constipation! It robs your strength, hardens your arteries and brings on premature old age. Do not let a day go by without a bowel movement. Do not sit and hope but go to a drug-

SPANISH RULER PLAYS LEAD IN FILM DRAMA

Toledo, Spain (AP)—King Alfonso of Spain was leading man in a moving picture of the recent royal hunting party on the estate of the Duke of Santona.

He permitted a film to be made of himself and his companions, not only while they were engaged in bringing down game, but also during intimate moments of family life in the castle. The camera operator obtained several views of the king playing on the ground with the duke's children.

GOVERNMENT STEEL PLANT

Johannesburg, South Africa (AP)—A state-owned steel plant having an annual output of 150,000 tons, or about half the present imports, is being developed in South Africa. Production of 500,000 tons is contemplated as the market grows. Plant equipment will be purchased from American, British or German manufacturers in open market.

Precautions against colds and "flu"

Do these two things:
1. Protect nose and throat
2. Keep system in good condition

There's no need to get panicky because the papers are full of news of an influenza epidemic. There's no use in isolating yourself because a lot of other people are sick with it. If you take two simple precautions every day—and then don't worry—the chances are you will throw off any cold or "flu" germs you are exposed to, and keep well.

We're not recommending that you dose yourself with a lot of medicines, either. Just observe two common-sense health rules which can be easily followed.

FIRST of all, make sure your system is in first class order. Don't let it get slowed up or sluggish. See to it that it functions perfectly. The easiest way to get run down and in a condition to pick up disease is to neglect this all-important matter.

Physicians agree that, particularly in times of epidemic, purging by laxatives and cathartics is not advisable. Many doctors are therefore prescribing Nujol, as in no case does it cause exhaustion or weakening of the system in any way.

Nujol can't possibly upset you or disagree with you. For it contains absolutely no medicine or drugs.

Get a bottle today at your nearest drug store and start taking Nujol tonight as one simple way to keep fit and to protect yourself against influenza.

That's the first precaution. Now for the second. Keep your nose and throat well protected with Mistol.

When you get a bottle of Nujol, get a bottle of Mistol, too.

HIGH TRIBUNAL TO PASS UPON 'POCKET VETO'

Washington, (AP)—The legality of "pocket vetoes" by the president, a debated question for more than a century, involving also the question of whether the Norris-Morin Muscle Shoals bill is a law, will be decided by the United States Supreme court.

Petition and supporting brief for a supreme court review of this question, decided in favor of the veto by the United States Court of Claims will be filed in the next few weeks by John G. Carter, attorney for several Washington state Indian tribes, in a suit involving this question exclusively.

The court of claims denied that the Indians had a right to sue the government, ruling that an act of congress passed to grant such permission was killed by President Coolidge's "pocket veto."

The "pocket veto" involved in this case, and also the one in the Muscle Shoals case, resulted when the president failed to sign a bill before the first session of congress recessed until December. Thus in these cases the congress did not pass out of existence, and according to the opponents of the veto theory, the bill is no more dead than if the congress had recessed over the week-end, or Christmas.

custom his family lived in the lower part of the jail.

When Mrs. McFarland was married it was to a young man who became the county's jailer. Later her husband was elected to the office of sheriff and they continued to reside in the jail.

A new sheriff having been elected recently, the McFarlands have had to retire to life in a cottage.

Dr. David says:

"I'm advising all my patients these days to keep Mistol on hand and use it regularly. The first thing in the morning before you go out. And again at night when you come home. Don't be afraid to use it freely. It will do no harm. And then stop worrying. You're done all you can to safeguard yourself."

"Put Mistol up your nose. There's a special dropper that comes in every package that makes it very easy to use. Just tilt your head back and drop it in your nose until you feel it in your throat. You'll notice the pleasant, cleansing effect at once. Mistol clears your head and makes breathing easy. It has a healing, soothing effect on the membranes and relieves any irritation or inflammation. It helps dry up a running nose. Use it, too, as a gargle. Mistol is good for a sore throat or hacking cough. And above all, protects the nose and throat against germs."

"Don't wait till you begin to sneeze or your throat aches. Take my advice and get a bottle of Mistol today. Every druggist knows it."

The combination treatment of Nujol and Mistol is a double safeguard against influenza. Start this wise two-fold precaution now. Don't delay.

Nujol and Mistol are both made by the same famous laboratories, of the finest quality materials and with the greatest skill possible. Both preparations are harmless. At all druggists. Aren't they worth trying?

When you get a bottle of Nujol, get a bottle of Mistol, too.
