Steiwer's Noble Service

Oregonians can note with pardonable pride that having recovered from the scare created by Jim Reed's little joke of threatening to publish the list of senators and congressmen who were persistent violators of the Volstead law and constant customers of bootleggers frequenting the corridors of the national capitol, Senator Steiwer did valiant service as one of the prohibition leaders in putting over the Anti-Saloon League's new bill providing drastic penalties for liquor law violators. Of course Mr. Steiwer is a comparatively recent convert to the cause of the noble experiment, having joined the ranks of the political dregs during his candidacy two years ago, but his zeal as a proselyter is all the greater.

The penalties provided by the bill engineered through by the Oregon senator and also voted for by Senator McNary include a \$10,000 fine or five years imprisonment or both for first offenders along with hardened violators of the Volstead act. It is therefore, as characterized by Senator Bruce "another step in the march of tyranny by marking out all distinction between first and subsequent offenses."

Now a \$10,000 fine and five years imprisonment for a first offense, for what is merely a misdemeanor, is going some, but we think the senator erred on the side of leniency. We already have life imprisonment for repeaters without checking the repeating, so that more drastic penalties are needed. The bill should have provided shooting at sunrise, which would at least decimate the number of the thirsty and ought to gladden the heart of ardent dregs like Senator Steiwer.

In this connection we again repeat our hope that the \$24,000,000 additional sought for enforcement be utilized to dry up the District of Columbia including congress. It would be retributive justice for some of our senators to have to pungle up \$10,000 and serve five years in prison for their first offense—that is the first they were caught at. Besides, it is only fair that those who provide penalties for others for doing what they do themselves, those whom Senator Reed characterized as "knavish hypocrites, who mask behind pretended virtue and seek to hold office by virtue of false pretenses" should be given a dose of their own purifying medicine and so help them "sink into that obliquity which is the just reward of cruelty, oppression and wrong."

For Consolidation

The heads of the State University and Agricultural College and Normal schools say that if it is necessary to have a board of regents and merge the millage taxes, they want to have something to say about it, and have agreed upon the following program, though objecting to the whole proposal:

Appointment of a board of regent to handle the affairs of the university, college and normals, the board to consist of nine members, the term of one to expire each year.

The governor is to make the appointments, but they must be confirmed by the senate, none of the regents is to be appointed from the towns in which the schools are located and not more than one member of the directors or regents shall be an alumnus of one or the other schools. This means that three of the board of regents will be alumnus, one from the normal, one from the college and one from the university. The sum derived from the millage will be pooled and the board of regents will make the necessary division.

The Schulmerich-Bell bill which creates a board of higher education with a board of nine directors who would hire a chancellor and have supervision and control of the normal schools and the university and college, attempts to carry out this plan. However, any consolidation program should be based upon a scientific survey of the institutions by impartial educational experts, but the selection of a common board is the first step towards the desired consolidation.

If the measure is defeated, it will probably be due to political pressure exerted by the higher educational institutions through their extensive organization in the legislature and without. However, if the legislature fails to act, a much more drastic program of consolidation will unquestionably be put up to the people by initiative petition.

WAYS, MEANS BODY OUT TO LOWER TAXES

(Continued from Page 1)

presented by W. G. Ide of Portland showing the number of new settlers that had been brought to the state. "You don't believe that, do you?" Strayer replied.

"Then you don't believe the state chamber is on a sound business basis?" Collier asked.

"I think the state chamber has on hand a high-pressure program to give somebody a job. Who it is I don't know," was Strayer's answer.

Only Kiddle and Collier voted to approve the bill.

The measures disapproved were: Dunne resolution for \$2500 for John B. Yeon memorial; \$2000 for polio disease investigations; \$12,000 for agricultural experiment station in Deschutes county; \$2500 to locate graves of ex-soldiers; \$980 claim of E. E. Jamison against state lime board; \$7500 for topographic map of state; bill to increase county fair tax levy from one-twentieth to one-tenth of a mill; to create a revolving fund for the state printer; providing for a committee to investigate the matter of taxes on federal forest lands.

A proposed appropriation of \$11,600 to reimburse Washington and Yamhill county farmers for clover plowed up under orders of the state board of horticulture in fighting the nematode pest, which had been disallowed the previous evening, was given another hearing Wednesday night.

The majority and minority reports of a sub-committee on state university and state college affairs, which have been the cause of much discussion, were tabled.

In place of the disappeared Yeon memorial resolution Senator Dunne will introduce another not carrying an appropriation.

A sub-committee was appointed to investigate the soldiers' and sailors' commission which is asking for \$1500. Senator Strayer recalled that about 10 years ago the legislature allowed it \$100,000, and said he wanted to know what was done with the money.

The committee approved a bill calling for an annual audit of all state departments.

Bills providing for appropriations covering improvement of streets in Eugene, Corvallis and Monmouth on which state property abuts were referred to the sub-committee on claims.

A senate joint resolution for a fact-finding commission to investigate the state university and the state college was tabled.

Claims presented for the relief of former holders of Columbia Southern project contracts were referred to the claims committee.

P. E. P. COMPANY TO BUILD DURING 1929

(Continued from Page 1)

and at a still later date, the building may be extended eastwards.

The company acquired property having a frontage of 100 feet on Liberty street, 240 feet on High street and approximately 60 feet on Division street, some time ago, preparatory to the erection of this building, and to provide space for future growth of its operating department.

The line department officers are now located in the wooden warehouse building beside the power plant on Liberty street near Mill.

Due to the big fill being made in Liberty street, between Trade and Mill and the construction of the culvert over the mill ditch, the present warehouse building is no longer suitable, and will be abandoned.

The main office of the company will continue to be located in its present quarters at 237 North Liberty street, until the time arrives to build an office and electric store building on the property which the company purchased a few years ago, just north of the Nelson building on Liberty and Chemeketa streets.

The expenditures contemplated in Salem and vicinity during the year 1929 include:

For extension of distribution system, including pole lines transformers, etc., \$90,000; installation of one 12,500 kilo-watt, 57,000 volt, three phase transformer at the power house at Mill and Liberty streets, \$45,790; one 10,000 kilo-watt rotary condenser at power house, \$59,000; warehouse on North Liberty, \$40,000; small additions to station buildings, \$2,500; gas main extension, \$1,200; outdoor substation in Morningside addition, \$3500; underground construction in Wilson avenue to permit removal of poles adjacent to Wilson avenue on Court and State streets, \$3,200. The expenditures total \$245,650.

The above contemplated expenditures are both a measure of the growth of Salem and vicinity, in an electrical way," Mr. Hamilton states, "and also an indication of the faith and confidence that the officials of the Portland Electric Power company have in the future growth of Salem and surrounding country.

The amount of money required for the extension of distribution lines in and about Salem, has been increasing annually, due to the rapid growth and development of the community.

"The installation of the above mentioned 12,500 kilo-watt transformer will increase the high tension transformer capacity of the local power stations 100 per cent."

A steel switching structure, similar to the one which the company has in West Salem, will be required to provide connections to and from this transformer.

The 10,000 kilo-watt rotary condenser is an item of equipment in the nature of a betterment providing

ELSINORE SOON TO HAVE PHOTOPHONE

(Continued from Page 1)

Contract has been let by A. J. Jackson, representative of the photophone, for wiring of the Elsinore theater for installation of the new talking equipment there to Vibbert & Todd, local electricians, announces George Guthrie, manager of the Elsinore.

Mr. Jackson states that the equipment will be ready for public opening probably by Saturday, March 2, and in any event unquestionably by Sunday, March 3. Virtually all of the equipment is now here for installation with a few pieces in transit to arrive the latter part of the week.

Manager Rosebaum of the Elsinore is now in Portland making arrangements for the initial talking productions and it is hoped to secure some of the best available on the new machine.

Increased in intensity throughout the night and air bubbled up through the lava, throwing showers of livid spray in the air. Cones of flame soared upward, pressure in the lava forcing the mass of liquid into the air.

Sulphur fumes over the area increased as the night wore on and a shifting wind may force the tourists to abandon their sight-seeing.

"Skinny" Women Gain Weight

New YEAST and IRON builds weight quickly. Your own druggist guarantees results—or pay nothing

If you are skinny as a rail, with gaunt limbs, and you seem to lack all energy, you need the food pounds of "slimy-pur" flesh and vitalizing strength that Ironized Yeast can give. Thousands of rundown, weak men and women have regained their normal weight and vigor with Ironized Yeast.

Ironized Yeast is two tonics in one—weight-building Yeast and strengthening Iron. The yeast is the same used in making malt, and which makes malt so beneficial, the same as found in fresh vegetables—spinach, lettuce and celery.

In this form Iron is easily assimilated by the body, making rich, red blood and toning up nerves and muscles.

Only when Yeast is Ironized in this way is it more effective—for Iron is needed to bring out the weight-building values of Yeast. By this formula Ironized Yeast gives you results in half the time required by yeast and iron taken separately.

Start taking Ironized Yeast today and get pounds of weight and new strength. You will not only feel better, but you will look better, as Ironized Yeast clears out the old deadening poisons and brings new healthy color to your cheeks and sparkle to your eyes. Pleasant-tasting tablets in a handy bottle, safe for everybody. Do not upset stomach nor cause gas or bloating.

Go to your druggist today and get a single course treatment. If not absolutely satisfied with weight and health benefits gained, money refunded.
