Stomach Disorders First Revealed by Coated Tongue

Your tongue is nothing more than the upper end of your stomach and intestines. It is the first thing your doctor looks at. It tells at a glance the condition of your digestive system—and physicians say that 90% of all sickness starts with stomach and bowel trouble.

A coated tongue is a danger signal of those digestive disorders which lead to so many kinds of serious illness. It tells why the least exertion tires you out, why you have pains in the bowels, gas, sour stomach, dizzy spells.

Coating on the tongue is a sign that you need Tanlac—the medicine which has helped thousands who were physical wrecks from stomach and bowel troubles—who had "tried everything" in vain and about given up hope.

Tanlac contains no mineral drugs; it is made of herbs, barks and roots. Get a bottle from your druggist today. Your money back if it doesn't help you.
