

### AIR BUBBLES CAUSE AGONY TO SEA DIVER

San Diego, Calif. (AP)—Details of a hurried trip to the Coronado Islands to render aid to a stricken deep sea diver suffering from "bends," incurred when he was hauled too rapidly to the surface from a 118 foot depth by a crew aboard the San Diego base submarine V-4, were learned upon the arrival here of the submarine rescue ship Ortolan. The endangered man who now is declared to be practically none the worse for having had three air bubbles in his veins, is George Peck, quartermaster, first class, attached to the V-4.

The pain experienced by Peck during the time he was waiting for the Ortolan's rescue crew to arrive at the V-4 is described as "terrible," with an air bubble in his arm, one in his leg and one in his forehead, any of one which momentarily might reach a "vital spot" and cause instantaneous death, Peck was in such torture even the touch of a companion's hand on any part of his body caused him to scream with pain.

Peck incurred the "bends" when an attempt was being made to prevent his drowning. While being slowly pulled to the surface on a submerged raft on which he was working under sea, he discovered a slight tear in one arm of his diving suit and gave the distress signal to the crew on board, who hauled him to the surface.

### IDAHO KIDNAPERS ROBBED IOWA BANK

Des Moines, Iowa, (AP)—Three men sentenced to prison for kidnaping W. B. Kinne, lieutenant governor of Idaho, are believed by Iowa officials to be members of a gang which robbed the Gilmore City exchange bank of \$5000 May 13, after keeping H. H. Van Ahstine, one of the owners and his family, prisoners overnight.

H. V. Yackey, state agent, was notified Tuesday that the men, giving their names as August Becker, 28, of Sumner, Iowa, Donald Melvin, 21, and Roy Salmon, both of Livermore, Iowa, had been identified by fingerprint records taken at Gilmore City.

Officials Wednesday were negotiating with Idaho authorities for possible extradition of the men to Iowa to stand trial for bank robbery.

### WOULD DRY HAY

Genese, Wis. (AP)—Arthur W. Koon has nearly completed work here on an invention with which he expects to shorten the normal period of time required to dry hay.

Koon's machine, which is 200 feet long and 50 feet high to accommodate large quantities of hay, is expected to complete in two minutes the hay-drying process that takes nature several weeks.

Aside from additional speed in drying the hay the new device is said to retain the original green color in the forage.

### LEAVES FOR IOWA

Amity—Mrs. Sarah "Grandma" Coover, started Monday for Iowa where she will spend the summer with relatives and friends. "Grandma" who is 89 years of age is making the trip alone.

### MRS. COULTER LEAVES

Amity—Mrs. Julia Coulter left Tuesday for the east where she will spend the summer with friends and relatives in North and South Dakota, Minnesota and Washington, D. C.

Bridgeport, Neb. (AP)—Nebraska claims a record size bullfrog. Willard Humpal, Bridgeport youth, caught a frog which measured 19 inches from nose to the toe and 19 inches also in circumference.

### HEAD THIRD LARGEST BANK

A new giant of the banking world was created with the consolidation of the Chase National Bank and the National Park Bank of New York. Albert H. Wiggin (left) is chairman of the board and Charles S. McCain, president of this bank, third largest in the world, with resources of \$1,700,000,000.

### CANADA SOFT DRINK INVASION PLANNED

Seattle (AP)—Americans still go to Canada for their "hard liquor" but Canada is bringing soft drinks to their home towns.

The Honey Dew Western, Ltd., one of the largest chain store organizations in Canada has leased a storeroom in Seattle. According to a recent announcement, the Seattle lease marks the first step in an invasion of the Pacific coast and later in Portland, San Francisco and other cities are under consideration.

The concern serves a fresh fruit drink.

### LIMEROCK ATTRACTS INTEREST AT DALLAS

Dallas—Two huge trucks loaded with limerock from the Oregon Lime Product company's quarry drew considerable attention in Dallas when the drivers parked to transact business. This was the second delivery since the plant opened to farmers or this region. The limerock is in excellent condition and contains no large lumps which have to be broken up before it can be used. A price of \$3 per ton at the plant is made and nearby deliveries are made by truck. The plant is also located on a railroad which enables them to ship to distant points.

### SPOTS STILLS FROM AIR

Johnston City, Tenn. (AP)—Deputy United States Marshall "Pat" Davis has "got 'em where he wants 'em." For weeks he flew around the mountains near here, "spotting" moonshine stills by the smoke of their fires. One raid after another is said to have been prompted by the flying deputy's findings.

The new Shell Fly Spray screws onto the spray can.

## For fly time

—a new stainless spray  
—a better type sprayer

**R**ID your home of dangerous flies and insects! Any good spray will do it. But if you wish to protect your walls, curtains and furnishings from ugly stains try the new Shell Fly Spray.

Used as directed it disappears completely—no more yellow, unsightly stains like old-style sprays once left. Shell Fly Spray was especially developed in Shell laboratories for use in homes.

And the new type sprayer pump is much simpler. You just screw the full can of spray right onto the sprayer. No waste, no mussy filling. When one can is emptied simply substitute another.

Both the sprayer and spray are sold in stores and at Shell stations. Don't let flies bother you another day!

### YOUNG ARTIST WINS ACCLAIM AT PARIS OPERA

Paris (AP)—Yehudi Menuhin, 12-year-old San Francisco violinist, is the sensation of the current music season. The critics have exhausted their vocabularies praising him and within a week two audiences at the Opera howled themselves into a state of frenzy. At his second recital one woman fainted. Not since Josef Hoffman, at the age of nine, toured the world giving piano recitals has anything been seen to parallel the reception accorded the American boy.

The program given by the violinist is one difficult enough to daunt the most finished of virtuosos. It ranges from the simple Romance in F, by Beethoven through Bach and Brahms concertos to the terrific Wieniawski concerto.

Philippe Gaubert, director of the Societe des Concerts, whose symphony orchestra accompanied the boy through the concertos, was as speechless as the rest after the second concert.

"No person in the world," he said, "has ever played the Wieniawski with such a technique as that."

Einstein's Comment  
A few weeks ago in Berlin, Al-

bert Einstein, the scientist, said after hearing him play.

"Our dear old Jehovah is still on the job!"

Paris and Berlin may deem themselves fortunate in having heard the prodigy. The Queen of England has been less favored. She sent him a personal invitation to come and play for her. But he refused. So too an invitation from Mussolini and another to play before 14,000 persons at the opening of the Barcelona Exposition.

Yehudi Menuhin is now "going into retirement." He will now go to Baden-Baden for a fortnight's rest, then to retirement for seven months where studying, working, playing under Adolf Busch in Switzerland, he will make ready for another concert or two next winter.

### PUBLICITY STUNT NETS COURT FINE

Portland, Ore. (AP)—Gerald Weaver, associated with a local theater as publicity manager, decided that he would rather pay \$15 fine than scrub the sidewalks of Portland.

Weaver could think of no alibi for painting "Alibi" signs on the street corners for the purpose of advertising a show of that name. "Either see that the signs are cleaned off or pay \$15 fine," the judge ruled.

He paid the fine.

### NEW BUILDING OF COMMERCE TO BE STARTED

Washington (AP)—They said of Emperor Augustus that he found Rome a city of brick and left it one of marble and posterity, may contribute some similar legend about Herbert Hoover and the national capital. It wouldn't be exactly true but inasmuch as the elaborate building and beautification program recently authorized for Washington by Congress will reach its fruition under Mr. Hoover, the new magnificence that will probably be linked with his name.

Mr. Hoover just a few days ago laid the cornerstone—and incidentally handled the mason's trowel more awkwardly than might have been expected of an engineer—of the new Department of Commerce building which will front the Ellipse back of the White House. This tremendous building, only one of a series which will transform the entire Pennsylvania avenue section of Washington, covers three huge city squares. It is 1,650 feet long—nearly a quarter of a mile—and longer than the Capital building here or the British houses of parliament—a symbol of the rising importance of commerce and business, which was not represented in the cabinet until 1903, as contrast-

### CRIME LABORATORY FIRST OF ITS KIND

Los Angeles (AP)—Said to be the first of its kind in the United States, a complete laboratory for scientific investigation of clues left behind by criminals at the scene of their crimes is being established for Deputy Sheriff Frank Gompert in the basement of the city hall here.

Gompert has perfected a decimal index and technical method whereby he is able to identify and classify 18,225 different types of human hair. A suspect arrested in connection with a recent crime gained release through this system of identification when Gompert es-

ablished beyond doubt that the real criminal was a man with hair dissimilar to that of the suspect.

Incidentally, Gompert makes a scientific study of tiny bloodstains, bits of clothing lint and other minute clues which would undoubtedly be overlooked by officers investigating a crime who were not schooled in this finer art of criminal detection.

Gompert's methods are said to be similar to the highly successful one now in general use throughout Europe. Hair, he said, is as easily distinguishable as finger prints, and can be used as a classified identification in the same way.
