Among the rush parties planned by the various sorority girls in Salem for the summer months is a bridge tea which will be given by the Gamma Phi Beta alumnae and actives about the middle of July. The majority of the rushing entertainment, however, is done during the three or four weeks preceding the opening of school and college.

Putnam Bronzes Highly Praised

The arrival from Paris of another group of bronzes by Arthur Putnam, sculptor, son of Mrs. Mary Putnam of Salem and brother of George and Elizabeth Putnam, and the exhibition of the bronzes at the National sculpture society's exhibition in the California Palace of the Legion of Honor at San Francisco, has occasioned a most interesting article on Mr. Putnam's work in the May issue of the American Magazine of art.

Ten of Mr. Putnam's bronzes were recently presented by Mrs. Alma de Bretteville Spreckles to the permanent collection of the California Palace of the Legion of Honor.

Rose V. S. Berry says in her article on Mr. Putnam's work that "As an animal sculptor there is no doubt that Putnam's place in the art world is among the ablest and best; it is a place he has obtained by terrific struggle and never ceasing effort." Also, "The collection on view at San Francisco assures the Putnam admirers that his work is at last bringing him to his own."

Rickreall Couple Wed Saturday

West Salem—A very pretty wedding ceremony was performed at high noon Saturday at the Methodist parsonage when Miss Dolly Richter, daughter of Mr. and Mrs. A. F. Richter of Rickreall, became the bride of Mr. Clyde Picha, also of Rickreall.

Preceding the ceremony Miss Sarah Bridgeman sang, "I Love You Truly" accompanied by Miss Helen Gosser. Miss Gosser also played the wedding march.

The bride was attended by her sister, Miss Ruby Richter. The best man was Ray Richter, brother of the bride.

The bridal party took their places under a beautiful arch of roses, candytuft and ivy, where the ceremony was performed by the Rev. Meredith A. Groves.

The bride wore a lovely gown of white satin and the maid of honor a frock of rose crepe de chine. Both carried arm bouquets of roses.

Immediately following the ceremony a wedding dinner was served at the home of the bride's parents.

Guests present were Mr. and Mrs. Picha, parents of the groom; Mr. and Mrs. Peebles, Miss Thelma Peebles, Miss Lois Moyer, Miss Nellie Richter, Miss Sarah Bridgeman, Miss Helen Gosser, Rev. and Mrs. M. A. Groves, Meredith Groves, Jr., and Mr. and Mrs. A. F. Richter.

Mr. and Mrs. Picha will make their home in Rickreall.

Mrs. W. E. Sodemman and Miss Margaret Fitzpatrick returned Monday evening from a three weeks' visit with California relatives and friends. In Burlington they were guests of Mrs. Sodemman's parents and Miss Fitzpatrick's grandparents, Mr. and Mrs. C. A. DeFusser. They visited in Berkeley with an aunt, Mrs. Beckerly, and with other relatives in San Francisco.

Delphinium Culture Discussed

Delphinium culture was discussed and prize blooms from some of Salem's gardens were judged by Dr. H. J. Clements at a meeting of the Salem garden club in the chamber of commerce auditorium Monday evening.

Mrs. W. E. Anderson received the blue ribbon for the best belladonna delphinium shown. Mrs. B. C. Kuenzli received first on a one-year-old candelabra type and F. A. Doerfler, first for a single cathedral and for a double cathedral type.

Slide pictures of delphinium blooms from the collection of Charles F. Barber of Hood Acres were shown by Otto Paulus. Mr. Barber is president of the delphinium association. A pure pink delphinium and a fragrant variety are prophesied for the next few years. Mr. Barber's slides included pictures of his pure white Bride's Maid, a bloom evolved in 1927.

Slugs are the greatest menace to delphinium culture. Dr. Clements told the garden club members, and the best way to kill slugs is to use carbo sulphate of bluestone. Plenty of lime and bone meal are necessary and it is exceedingly wise to give the plants plenty of room, said the expert amateur gardener.

The American Delphinium society judges a delphinium on the length of the main spike, its erectness, the size of the open florets, the uniform arrangement of florets, number open and color and form.

Doubles must have developed florets of at least two complete rows with a five petaled central bee and additional sub-petals centered; semi-doubles develop florets of at least one complete row, five petaled central bee, sub-petals centered; singles must develop florets of one complete row, five petaled central bee with no additional sub-petals.

Without water, said to be the best way to raise delphinium, only one blooming can be expected, says Dr. Clements. In California with the use of water as many as five flowering periods are attained. Oregon growers can get at least two, says Dr. Clements.

Arrangements for the fall garden show will be made at the next meeting of the club the first Monday in August. The city beautiful contest which has nearly 50 entries will be closed in late August.

The club president, F. A. Doerfler, appointed committees to take charge of furnishing flowers for conventions to be held in Salem during the summer months.
