

COUNTRY CUBES MAKE TROUBLE IN DAIRY TRADE

Portland, Ore. (AP)—Condition of the butter trade Tuesday is such as to cause considerable confusion and loss to country operators.

Naming of prices on country cubes by a couple of local makers who refuse to purchase the country stock at the prices named is causing adverse comment here.

Plans for the opening of a Portland headquarters of the country creameries are well under way. It is hoped by the establishment of such a place to establish and stabilize the trade in country cubes which constitutes the bulk of the butter consumed in Portland.

Market for cube butter continues to reflect more or less weakness here but leading operators in the cubes are making no change in their quotations on country cubes.

General conditions in the egg market appear steady. Receipts are showing little change as to volume but quality is badly mixed.

Owing to the cut-throat methods now in vogue in the dressed poultry trade, killers are complaining loudly of the lack of profit.

First carload of Idaho potatoes of the season are on the track here. The absence of large-sized local potatoes has caused the trade to send elsewhere for its needs in this regard.
