Kingwood Heights Model Home Completely Furnished By Hamilton Furniture Company

We wish to congratulate Major C. A. Robertson and his associates for the splendid progress made by them in developing the Kingwood Heights addition. We believe that this district will become one of Salem's most attractive residential sections and are proud to have been selected to completely furnish its first model home.

The furniture that we have used for this occasion is entirely in keeping with the English style home yet displays conservative expression of the modern artistic trend. The same idea can be worked out in any home where dignity of style is desired along with the lively attraction of color.

The Kingwood Heights model home is up to the minute in every respect and all its equipment is of the very finest. It is for this reason that a Monarch electric range of the latest type has been selected for the kitchen. The model used is finished all in white enamel and is of the double oven type with four surface units. The range is equipped with rust proof aluminum oven, individual fuses, safety switch, full automatic oven control, reflecting surface units that waste no heat, and many other desirable features.

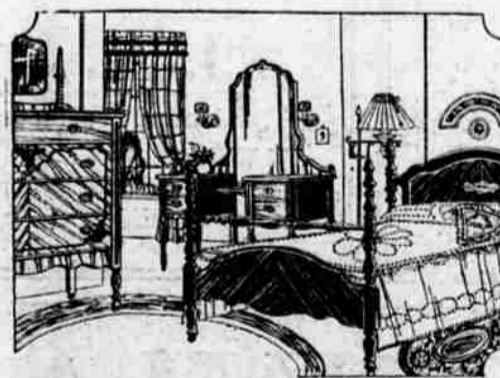

The attractive appearance of the Monarch along with its quick heating oven and surface units have made this range extremely popular with Salem women.

Cooking is done at little cost on a Monarch.

When Charles II came to England's throne he swept away the austerities of the Puritans and introduced new luxuries and comforts. Rigid lines in furniture gave way to gentle comfort as well as appearance. In the living room furniture for the model home we have followed the idea of comfortable dignity.

The dining room of the model home is adorned by a massive Berky & Gay dining suite.

A bedroom is no longer merely a sleeping apartment when it is furnished stungingly in gorgeous furniture to exactly suite one's tastes. It becomes rather, an exquisite boudoir where every leisure hour is spent. It offers an ideal place to enjoy quiet reading, to write a letter without interruption, to snatch that half hour's rest before dinner time. In furnishing the model home we have attempted to make each bedroom a radiant boudoir.

ELECTRO-KOLD
The Simplest Electric Refrigerator

The kitchen of the model home is given an absolutely modern touch by the presence of the Electro-Kold refrigerator, an aristocrat in the field of electric refrigeration. The four door all porcelain Seeger cabinet provides ample storage space and the four tray freezing coil assures plenty of ice cubes and frozen deserts. The machine is equipped with temperature control for use when quick freezing is desired. Electro-Kold uses an absolutely non-poisonous, non-explosive gas.

On account of its economy and quiet operation Electro-Kold has been selected for many of the finest homes in the city.

Over 350 now operating in the Salem district.
