County Commissioner Porter re-County Commissioner Porter re-ported Monday that Jim Bonner, employed with the Dummerfer threshing crew on the A. H. Myers place five miles southeast of Sil-verton, suffered aevere injuries just as the crew was cleaning up work at the place. A pitchfork, held by Bonner, was caught in the feeder belt on the machine and the handle of the fork struck Bonner in the eye. Bonner's nose was broken and he sustained other injuries about the face.

ROCKET RIDE

TO THE MOON

Paris (19)—Six men have asked for the privilege of riding in the rocicet which may be shot into the aky for a visit to the moon within the next year. Professor Oberth, creator of the plan for the rocket, has personally received three applications and Ro-bert Esnault-Peletier, the astrono-mer, has received the others. Both admit that the possibility of a safe return is exceedingly small. The first danger less in the rock-eis going away before it clears the searth; the result in that case would be a crash and certain death. The second is the possibility of striking the moon or other hard, opaque body in the heavens. The third, is in descending, in which case Prof. Oberth has pointed out that the projectile is aure to be either dent-der d estroyed in striking the cush-

STORMS FIRE IDAHO FORESTS

Boise, Idaho, (P)-Stormy weath-er in southwest Idaho started seven fires Sunday in the Boise National foret. Officials of the forestry of-fice in Boise said they were ex-pecting still more fre to be dis-porting still more to be discovered Monday. One of the blazes was quickly put under control Monday and men were rushed to combat the others. The only section of the Boise district which received an appre-ciable amount of rainfall was in the northwestern part, near Low-man, but there were no blazes in that area. The huge blaze in the Sawtooth region was put under control Mon-day after if had burned over 3500 acres, and the men who were fight-ing it were rushed to other first. ed or destroyed in striking the cush-ion of atmosphere which envelope the earth. Finally, there is the question of air, although an American astronomer has devised a scheme for supplying oxygen to the

Monday. Governors Erickson of Montana, Emmerson of Wyoming, Baldridge of Idaho, Phillips of Arizona, Bal-zar of Nevada and Dern of Utah, attended the conference personally while governors of Oregon, Colo-rado, California, New Mexico and Washington were represented by delegates. Assistant Secretary of Interior Joseph M. Dixon is repre-senting President Hoover. The call for the conference was inspired by the recent announce-ment of Dr, Ray Lyman. Wilbur that the time was right for the states to consider taking over the surface rights to the public domain. This, coupled with asserted propa-gands which it is claimed has been irculated in the middle western states against federal aid to recla-mation projects, created the feeling that unified action was necessary to forestall any such possibility. The governors and delegates were eagerly awaiting the delivery of President Hoover's message to the conference which will be read by Assistant Secretary of Interior Dir-n. Konday. Is was intimated that President Hoover's attitude regard-ing the relationship of states and the federal government in regard to public lands will be outlined. **POLICEWOMEN LAUDS MOVIES**
