Gilnes was the last speaker of the morning session when she discussed public school education and called the club women's attention to education week from November 11 to 17. The afternoon session opened with a round-table discussion on the morning talks. The state president, Mrs. Frankel, presided.

During the business session which

followed, the new district adopted practically the same constitution now used by the other five districts in the state. It was decided that annual meetings of the district will be held in February on alternate years.

Music during the day included cello solos by Clyde Cooley and vocal solos by Mrs. S. W. Starr, their teacher, their teacher, Dr. R. W. Hans Seitz played their accompaniments.

the new Hotpoint electric range is Economical

Foods cooked electrically show practically no shrinkage

Economy . . . cleanliness . . . convenience . . . speed. You achieve all these when you install the new Hotpoint Electric Range.

When baking biscuits or pie crust your oven will heat to 450° in 10 minutes . . . and it takes longer than that to prepare the dough. No other oven is quite so speedy.

As for cleanliness . . . all units can be removed to be cleaned . . . quickly and easily. All corners are covered, so with a single wipe of a damp cloth your Hotpoint is cleaned.

The baked hams pictured give you some idea of shrinkage comparison.

Home economists know that meat and fowl baked in an electric oven show almost no shrinkage . . . while those baked in other ways show considerable shrinkage.

Why? Because there are no fumes that must be forced out of the oven . . . carrying with them the precious, nutritive juices. Foods cooked electrically require the addition of almost no water . . . they cook in their own juices . . . and are more tender . . . fuller flavored.
