Needless Pain!

The man who wouldn't drive his motorcar half a mile when it's out of order, will often drive his brain all day with a head that's throbbing.

Such punishment isn't very good for one's nerves! It's unwise, and it's unnecessary. A tablet or two of Bayer Aspirin will relieve a headache every time. So, remember this accepted antidote for pain, and spare yourself a lot of needless suffering. Read the proven directions and you'll discover many valuable uses for these tablets. For headaches; to check colic. To ease a sore throat and reduce the infection. For relieving neuralgic, neuritic, rheumatic pain.

People used to wonder if Bayer Aspirin was harmful. The doctors answered that question years ago. It is not. Some folks still wonder if it really does relieve pain. That's settled! For millions of men and women have found it does. To cure the cause of any pain you must consult your doctor; but you may always turn to Bayer Aspirin for immediate relief.

Now Millions More Stop "Dosing" Colds

Better External Treatment Wins New Users All Over the World

Every year since the introduction of Vicks Vapo-Rub, more and more people have given up the old-fashioned way of "dosing" colds and have turned to the modern method of treating them externally. Today, the whole trend of medical practice is away from the needless "dosing."

Best for Children's Colds

From the very first Vicks has been appreciated, especially by mothers of young children, because it checks colds without risk of upsetting delicate stomachs as "dosing" is apt to do.

Just rubbed on, Vicks acts through the skin like a poultice or plaster, "drawing out" tightness and soreness at the same time, it gives off medicated vapors which are inhaled direct to the inflamed air-passages.

Demand Increases Each Year

As more and more people appreciate this better method of treating colds, the demand for Vicks increases year after year. Only a short time ago the famous slogan, "Over 17 Million Jars Used Yearly," was raised to "21 Million" to keep step with this demand. These figures, too, have been outgrown, as there are now "Over 26 Million Jars Used Yearly"—a jar for every family in the United States.
