"Must cigar smokers be endangered?"

No!!! I say"

"Any man who smokes a Cremo is safe... I certify Cremo as sanitary."

Says
Alfred W. McCann
D. Litt., A.B., LL.D.,
noted pure food expert, long active in crusades for pure foods and sanitary factories.

"When you put a Cremo between your lips, you are protecting yourself from any possible infection from unsanitary tobaccos—you're playing safe."

"Every tobacco leaf entering the Cremo factory is scientifically treated by U. S. Government approved methods. And every sanitary precaution known to science is taken to safeguard its purity along every step of the way."

"Each Cremo is folded, wrapped and tipped by amazing inventions! In factories that are models of cleanliness... air-flooded, sun-bathed, scientifically clean."

"And to protect its purity until it reaches your mouth, each Cremo is sealed in a separate foil wrapper."

"So when you smoke a Cremo, you get the same scientific health protection that comes with certified milk!"

How often have you been disgusted with the filthy, germ-breeding places where some cigars are made... dark, stuffy factories... warm, dingy shops and windows... where cigars are rolled by careless, dirty lips and fingers and spit on the ends! What a far cry this is from the modern method of manufacture used by **Certified Cremo**.

The superiority of Certified Cremo starts with the choicest and tenderest leaves, ripe and mellow, and continues in goodness through a slow, expensive maturing and mellowing process... and topped off with a wrapper that is really fine. Certified Cremo contains no scrap—no floor sweepings—all long filler—all fresh, tender leaves. Over \$7,000,000 was spent in perfecting the method of manufacture used by Certified Cremo that insures uniformly fine, clean cigars. Foil-wrapped... sanitary... crush-proof... the kind of cigar that the late Vice-President Marshall must have had in mind when he said: "What this country needs most is a good 5-cent cigar."
