HALF MILLION YANKEES MAKE HOMES ABROAD

Washington (AP)—Nearly half a million American citizens have left the United States to take up residence abroad during the last twelve years.

Of these 435,000 were native born, while 62,000 were naturalized, and the Department of Labor, in its annual report Monday, said they had sought "permanent, or at least extended" places of living in other lands.

The figures, which were compiled by the Commissioner General of Immigration, said that during the last 22 years nearly 4,000,000 resident aliens of the United States left with the stated intention of living in some foreign country. About 12,000,000 immigrant aliens were admitted during the same period.

"The number leaving the country has diminished greatly since the quota law went into effect," the report said, "but even now 25 alien residents emigrate for every 100 immigrants who enter for permanent residence, compared to 29 immigrants for 100 immigrants for the whole 22 years."
